

Model PD6001 User Guide

Plasma Monitor

IMPORTANT SAFETY INSTRUCTIONS

Read before operating equipment

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with a dry cloth.
7. Do not block any of the ventilation openings. Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and third grounding prong. The wide blade or third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12.  Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

(Additional Safety Information)

15. This product may contain lead or mercury. Disposal of these materials may be regulated due to environmental considerations. For disposal or recycling information, please contact your local authorities or the Electronic Industries Alliance: www.eiae.org.
16. **Damage Requiring Service** - The appliance should be serviced by qualified service personnel when:
 - A. The power supply cord or the plug has been damaged; or
 - B. Objects have fallen, or liquid has been spilled into the appliance; or
 - C. The appliance has been exposed to rain; or
 - D. The appliance does not appear to operate normally or exhibits a marked change in performance; or
 - E. The appliance has been dropped, or the enclosure damaged.
17. **Tilt/Stability** - All televisions must comply with recommended international global safety standards for tilt and stability properties of its cabinets design.
 - Do not compromise these design standards by applying excessive pull force to the front, or top, of the cabinet which could ultimately overturn the product.
 - Also, do not endanger yourself, or children, by placing electronic equipment/toys on the top of the cabinet. Such items could unsuspectingly fall from the top of the set and cause product damage and/or personal injury.
18. **Wall Mounting** - The appliance should be mounted to a wall only as recommended by the manufacturer.
19. **Power Lines** - An outdoor antenna should be located away from power lines.
20. **Outdoor Antenna Grounding** - If an outside antenna is connected to the receiver, be sure the antenna system is grounded so as to provide some protection against voltage surges and built up static charges. Section 810 of the National Electric Code, ANSI/NFPA No. 70-1984, provides information with respect to proper grounding of the mats and supporting structure grounding of the lead-in wire to an antenna-discharge unit, size of grounding connectors, location of antenna-discharge unit, connection to grounding electrodes and requirements for the grounding electrode.
21. **Objects and Liquid Entry** - Care should be taken so that objects do not fall and liquids are not spilled into the enclosure through openings.

Apparatus shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on apparatus.

WARNING

To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture.

PRÉCAUTIONS IMPORTANTES DE SÉCURITÉ

A lire avant de faire fonctionner l'appareil

1. Lire ces instructions.
2. Garder ces instructions.
3. Respecter tous les avertissements.
4. Suivre toutes les instructions.
5. Ne pas utiliser cet appareil près de l'eau.
6. Nettoyer seulement avec un chiffon sec.
7. Ne pas boucher les ouvertures d'aération. Installer selon les instructions du fabricant.
8. Ne pas installer près d'une source de chaleur telle qu'un radiateur, une bouche de chauffage, une cuisinière ou d'autre matériel (y compris des amplificateurs) qui produit de la chaleur.
9. Ne pas contourner la sécurité fournie par la fiche polarisée ou la fiche de mise à la terre. Une fiche polarisée possède deux lames dont une plus large que l'autre. Une fiche de mise à la terre possède deux lames et une broche de mise à la terre. La lame large ou la broche est fournie pour votre sécurité. Si la fiche fournie ne va pas dans la prise, demander à un électricien de remplacer la prise démodée.
10. Protéger le cordon d'alimentation en ne pas marchant dessous ni le coinçant, en particulier près des fiches, des prises et de l'endroit où le cordon rejoint de l'appareil.
11. N'utiliser que des accessoires préconisés par le fabricant.
12.  Utiliser seulement avec le chariot, meuble, trépied, support ou table spécifié par le fabricant ou vendu avec l'appareil. En utilisant un chariot, au moment de déplacer le chariot/téléviseur, bien faire attention pour éviter des blessures dues au renversement éventuel.
13. Débrancher cet appareil pendant des orages ou lorsqu'il ne sera pas utilisé pendant longtemps.
14. Consulter un technicien agréé de service après vente pour toute réparation.

Le service après vente est nécessaire lorsque l'appareil a été endommagé de quelque façon que ce soit, telle que lorsque le cordon d'alimentation ou la fiche est endommagé, du liquide renversé, un objet tombé dans l'appareil, l'exposition de l'appareil à la pluie ou l'humidité, lorsque l'appareil ne fonctionne pas normalement ou lorsqu'on a laissé tomber l'appareil.

(Informations de Sécurité Supplémentaires)

15. Ce produit peut contenir un plomb ou du mercure. La mise à rebut de ces matières pourrait être réglementée pour des raisons de protection de l'environnement. Pour s'informer sur la mise à rebut ou le recyclage, veuillez se mettre en contact avec les autorités locales ou l'Electronic Industries Alliance: www.eiae.org.
16. **Dommages qu'il faut faire réparer** - Il faut faire réparer l'appareil par un technicien qualifié lorsque:
 - A. Le cordon d'alimentation en électricité ou la fiche a été endommagé; ou
 - B. On a laissé tomber des objets ou du liquide dans l'appareil;
 - C. On a exposé l'appareil à la pluie; ou
 - D. L'appareil ne paraît pas marcher normalement ou présente de grands changements d'opération; ou
 - E. On a laissé tomber l'appareil ou endommager le coffret.
17. Tous les téléviseurs doivent être conformes aux normes inter-nationales de sécurité préconisées pour les propriétés de stabilité et d'inclinaison dans la conception des meubles.
 - Ne pas compromettre ces normes de conception en tirant excessivement sur le devant ou le haut du meuble, ce qui risque éventuellement de renverser le produit.
 - De plus, ne pas se mettre en danger, ni mettre les enfants en danger en plaçant du matériel électronique ou des jouets sur le meuble. De tels articles pourraient tomber malencontreusement du haut du téléviseur et endommager le produit et/ou blesser des gens.
18. **Montage au mur ou au plafond** - Il faut monter l'appareil à un mur ou plafond uniquement en suivant les recommandations du fabricant.
19. **Lignes de transmission** - Il faut situer une antenne extérieure à l'écart des lignes de transmission d'électricité.
20. **Mise à terre de l'antenne extérieure** - Si une antenne extérieure est reliée au récepteur, assurez-vous que le système d'antenne est bien mis à la terre pour protéger contre les sauts de tension et l'accumulation des charges d'électricité statique.
La section 810 du National Electric Code, ANSI/NFPA No. 70-1984, fournit des renseignements sur la mise à la terre du mât et de sa structure de soutien, du fil d'entrée à un appareil de décharge/antenne, sur la grosseur des conducteurs de mise à terre, sur l'emplacement d'un appareil de décharge/antenne, sur la mise à la terre vers les électrodes de terre, ainsi que sur les recommandations sur les électrodes de terre.
21. **Entrée des objets et des liquides** - Evitez de laisser tomber des objets ou des liquides par les ouvertures de l'enclos.

Ne pas exposer l'appareil aux projections ou aux écoulements d'eau et ne jamais poser un récipient contenant du liquide, un vase par exemple, sur l'appareil.

AVERTISSEMENT

Pour réduire les risques d'incendie ou d'électrocution, ne jamais exposer cet appareil à la pluie ou à l'humidité.

Important Information

Precautions

Please read this manual carefully before using your plasma monitor and keep the manual handy for future reference.

CAUTION

RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER. NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

This symbol warns the user that uninsulated voltage within the unit may have sufficient magnitude to cause electric shock. Therefore, it is dangerous to make any kind of contact with any part inside of this unit.

This symbol alerts the user that important literature concerning the operation and maintenance of this unit has been included.

Therefore, it should be read carefully in order to avoid any problems.

WARNING

TO PREVENT FIRE OR SHOCK HAZARDS, DO NOT EXPOSE THIS UNIT TO RAIN OR MOISTURE. ALSO DO NOT USE THIS UNIT'S POLARIZED PLUG WITH AN EXTENSION CORD RECEPTACLE OR OTHER OUTLETS, UNLESS THE PRONGS CAN BE FULLY INSERTED. REFRAIN FROM OPENING THE CABINET AS THERE ARE HIGH-VOLTAGE COMPONENTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

Warnings and Safety Precaution

This plasma monitor is designed and manufactured to provide long, trouble-free service. No maintenance other than cleaning is required. Please see the section "Plasma monitor cleaning procedure".

The plasma display panel consists of fine picture elements (cells) with more than 99.99 percent active cells. There may be some cells that do not produce light or remain lit.

For operating safety and to avoid damage to the unit, read carefully and observe the following instructions.

To avoid shock and fire hazards:

1. Provide adequate space for ventilation to avoid internal heat build-up. Do not cover rear vents or install the unit in a closed cabinet or shelves.

If you install the unit in an enclosure, make sure there is adequate space at the top of the unit to allow hot air to rise and escape. If the monitor becomes too hot, the overheat protector will be activated and the monitor will be turned off. If this happens, turn off the power to the monitor and unplug the power cord. If the room where the monitor is installed is particularly hot, move the monitor to a cooler location, and wait for 60 minutes to cool the monitor. If the problem persists, contact your dealer for service.

2. Do not use this unit's polarized plug with extension cords or outlets unless the prongs can be completely inserted.

3. Do not expose the unit to water or moisture.

4. Avoid damage to the power cord, and do not attempt to modify the power cord.

5. Unplug the power cord during electrical storms or if the unit will not be used over a long period.

6. Do not open the cabinet which has potentially dangerous high voltage components inside. If the unit is damaged in this way the warranty will be void. Moreover, there is a serious risk of electric shock.

7. Do not attempt to service or repair the unit. The manufacturer is not liable for any bodily harm or damage caused if unqualified persons attempt service or open the back cover. Refer all service to authorized Service Centers.

8. This equipment shall be connected to a MAIN outlet with a protective earth-ground connection.

9. The outlet shall be installed near the equipment and shall be easily accessible.

To avoid damage and prolong operating life:

1. Use only with 100 V to 240 V 50 Hz/60 Hz AC power supply. Continued operation at line voltages greater than 100 V to 240 V AC will shorten the life of the unit, and might even cause a fire hazard.
2. Handle the unit carefully when installing it and do not drop.
3. Set the unit away from heat, excessive dust, and direct sunlight.
4. Protect the inside of the unit from liquids and small metal objects. In case of accident, unplug the power cord and have it serviced by an authorized Service Center.
5. Do not hit or scratch the panel surface as this causes flaws on the surface of the screen.
6. For correct installation and mounting it is strongly recommended to use a trained, authorized dealer.
7. As is the case with any phosphor-based display (like a CRT monitor, for example) light output will gradually decrease over the life of a Plasma Display Panel.
8. To avoid sulfurization it is strongly recommended not to place the unit in a dressing room in a public bath or hot spring bath.
9. Do not use in a moving vehicle, as the unit could drop or topple over and cause injuries.
10. Do not place the unit on its side, upside-down or with the screen facing up or down, to avoid combustion or electric shock.
11. To prevent a fire hazard, do not place any naked flame sources (such as a lighted candle) on the equipment.

Plasma monitor cleaning procedure:

1. Use a soft dry cloth to clean the front panel and bezel area. Never use solvents such as alcohol or thinner to clean these surfaces.
2. Clean plasma ventilation areas with a vacuum cleaner with a soft brush nozzle attachment.
3. To ensure proper ventilation, cleaning of the ventilation areas must be carried out monthly. More frequent cleaning may be necessary depending on the environment in which the plasma monitor is installed.

Recommendations to avoid or minimize image retention:

Like all phosphor-based display devices and all other gas plasma displays, plasma monitors can be susceptible to image retention under certain circumstances. Certain operating conditions, such as the continuous display of a static image over a prolonged period of time, can result in image retention if proper precautions are not taken. To protect your investment in this plasma monitor, please adhere to the following guidelines and recommendations for minimizing the occurrence of image retention:

- * Always enable and use your computer's screen saver function during use with a computer input source.
- * Display a moving image whenever possible.
- * Change the position of the menu display from time to time.
- * Always power down the monitor when you are finished using it.

If the plasma monitor is in long term use or continuous operation take the following measures to reduce the likelihood of image retention:

- * Lower the Brightness and Contrast levels as much as possible without impairing image readability.
- * Display an image with many colors and color gradations (i.e. photographic or photo-realistic images).
- * Create image content with minimal contrast between light and dark areas, for example white characters on black backgrounds. Use complementary or pastel color whenever possible.
- * Avoid displaying images with few colors and distinct, sharply defined borders between colors.

Plasma monitor driving sound

The panel of the Plasma monitor is composed of extremely fine pixels and these pixels emit light according to received video signals. This principle may cause you to hear a buzz or electrical hum coming from the Plasma monitor. Also note that the rotation speed of the cooling fan motor increases when the ambient temperature of the Plasma monitor becomes high. You may hear the sound of the motor at that time.

Note:

The following items are not covered by the warranty.

- Image retention
- Panel generated sound, examples: Fan motor noise, and electrical circuit humming /glass panel buzzing.

Contact your dealer for other recommended procedures that will best suit your particular application needs.

Recommandations importantes

Précaution

Veuillez lire avec attention ce manuel avant d'utiliser le moniteur à plasma et le conserver accessible pour s'y référer ultérieurement.

ATTENTION

RISQUE D'ELECTROCUTION
NE PAS OUVRIR

ATTENTION: POUR EVITER TOUT RISQUE D'ELECTROCUTION, NE PAS OUVRIR LE BOITIER. A L'INTERIEUR, AUCUNE PIECE NE NECESSITE L'INTERVENTION DE L'UTILISATEUR. EN CAS DE PROBLEME, S'ADRESSER A UN REPARATEUR SPECIALISTE. Ce symbole est une mise en garde contre les risques d'électrocution que présentent certaines parties dépourvues d'isolation à l'intérieur de l'appareil. Il est donc dangereux d'établir le moindre contact avec ces parties. Ce symbole avertit l'utilisateur que d'importantes informations sont fournies sur le fonctionnement ou l'entretien de cet appareil. De ce fait, il faut lire attentivement ces instructions pour éviter tout problème.

AVERTISSEMENT

AFIN D'EVITER TOUT RISQUE D'INCENDIE OU D'ELECTROCUTION, NE PAS EXPOSER CET APPAREIL A LA PLUIE OU A L'HUMIDITE. NE PAS BRANCHER LA PRISE D'ALIMENTATION POLARISEE DANS UNE PRISE MURALE AVEC UNE RALLONGE OU UN ADAPTATEUR MULTIPRISE SI LES FICHES NE PEUVENT ETRE INSERERES COMPLETEMENT. EVITER D'OUVRIR LE BOITIER CAR CELUI-CI PROTEGE DES COMPOSANTS FONCTIONNANT A HAUTE TENSION. EN CAS DE PROBLEME, S'ADRESSER A UN REPARATEUR SPECIALISTE.

Avertissements et précautions de sécurité

Ce moniteur à plasma a été conçu et fabriqué pour une utilisation fiable et durable. Il ne nécessite aucun entretien en dehors du nettoyage. Voir la section "Méthode de nettoyage du moniteur à plasma" plus loin.

Le panneau à affichage plasma est constitué de fines particules d'images (cellules) dont plus de 99,99 % sont actives. Certaines d'entre elles ne produisent pas de lumière ou restent allumées.

Pour des raisons de sécurité et pour éviter d'endommager l'appareil, lire attentivement les instructions suivantes.

Pour éviter les risques d'électrocution et d'incendie:

1. Laisser suffisamment d'espace autour de l'appareil pour la ventilation et éviter toute augmentation excessive de la température interne. Ne pas couvrir les fentes d'aération ou installer l'appareil dans un endroit trop exigu. Si vous installez l'appareil dans un espace clos, assurez-vous qu'il y ait suffisamment d'espace au dessus pour permettre l'air chaud de s'élever et de s'évacuer.
2. Ne pas raccorder la prise d'alimentation polarisée de ce périphérique à une rallonge ou une prise murale si les fiches ne peuvent pas être complètement insérées.
3. Ne pas exposer cet appareil à la pluie ou à l'humidité.
4. Eviter d'endommager le câble d'alimentation et ne pas le modifier.
5. Débrancher le câble d'alimentation électrique pendant les orages ou les longues périodes d'inactivité.
6. Ne pas ouvrir le boîtier protégeant les parties dangereuses fonctionnant à hauts voltages. Si l'appareil est endommagé de cette manière, la garantie sera annulée. De plus, les risques d'électrocution sont grands.
7. Ne pas essayer d'intervenir ou de réparer l'appareil. Le fabricant décline toute responsabilité en cas de blessure corporelle ou de dégâts matériels résultant d'une opération d'entretien quelconque effectuée par des personnes non qualifiées ou résultant de l'ouverture du couvercle arrière. S'adresser au service après-vente autorisé.
8. Cet équipement doit être connecté à une prise secteur (MAIN) équipée d'une mise à la terre.
9. La prise secteur doit se trouver près de l'équipement et doit être facile d'accès.

Pour éviter tout dommage et assurer une utilisation durable:

1. Utiliser seulement une alimentation en courant de 100 V à 240 V 50 Hz/60 Hz. Toute utilisation prolongée avec un courant supérieur à 100 V à 240 V risque de diminuer la durée de vie de l'appareil et même de provoquer un incendie.
2. Manipuler l'appareil avec précautions lors de son installation, ne pas le laisser tomber.
3. L'installer loin de toute source de chaleur ou de poussière. Ne pas l'exposer au soleil.
4. Eviter la pénétration de liquides ou petits objets métalliques à l'intérieur de l'appareil. En cas d'incident de ce genre, débrancher le câble d'alimentation électrique et confier le moniteur à un service après-vente agréé.
5. Ne pas cogner ou rayer la surface de l'écran, des déformations de l'image en résulteraient.
6. Pour un montage et une installation correcte, il est fortement recommandé de faire appel à un revendeur agréé et qualifié.
7. Comme c'est le cas pour tout affichage à base de phosphore (comme un moniteur CRT, par exemple), la puissance de lumière baisse graduellement au cours de la vie du panneau d'affichage à plasma.
8. Pour éviter tout risque de sulfuration, il est fortement conseillé de ne pas installer l'appareil dans un vestiaire, un bain public ou un bain de source thermale.
9. Ne pas utiliser dans un véhicule en marche car l'unité pourrait tomber ou glisser et provoquer des blessures.
10. Pour éviter l'inflammation ou les chocs électriques, ne pas placer l'unité sur la tranche, à l'envers ou avec l'écran vers le bas ou vers le haut.
11. Pour éviter les risques d'incendie, ne placez aucune flamme nue (telle qu'une bougie allumée) sur l'appareil.

Méthode de nettoyage du moniteur à plasma:

1. Nettoyer le panneau avant et le cadre en procédant à l'aide d'un chiffon doux et sec. Ne jamais utiliser de solvants du type alcool ou diluant pour le nettoyage de ces surfaces.
2. Nettoyer les prises d'aération du plasma en procédant à l'aide d'une brosse à poils doux fixée à un aspirateur.
3. Pour garantir la bonne ventilation du moniteur, nettoyer les prises d'air tous les mois. Un nettoyage plus fréquent peut s'avérer nécessaire selon les conditions environnantes dans lesquelles le moniteur à plasma est utilisé.

Pour éviter les risques de brûlage du luminophore, les mesures suivantes sont recommandées:

Comme tous les périphériques d'affichage à base luminophore et tous les autres affichages gaz plasma, les moniteurs plasma peuvent être sujets au brûlage du luminophore dans certaines circonstances. Certaines conditions d'utilisation, telles que l'affichage continu d'une image statique pour une durée prolongée, peuvent causer le brûlage du luminophore si aucune précaution n'est prise. Pour protéger votre investissement dans ce moniteur à plasma, veuillez suivre les directives et les conseils suivantes pour minimiser l'occurrence du marquage de l'écran:

- * S'assurer de mettre en marche et d'utiliser l'économiseur d'écran chaque fois que c'est possible, pendant l'utilisation avec une source d'entrée venant d'un ordinateur.
- * Afficher une image en mouvement aussi souvent que possible.
- * Changer la position de l'affichage de menu de temps à autre.
- * Toujours couper l'alimentation après la fin de l'utilisation du moniteur. Si le moniteur à plasma est en usage continu ou de longue durée, prendre les mesures suivantes afin d'éviter l'occurrence du brûlage du luminophore:
- * Abaisser le niveau de l'image (contraste, luminance) autant que possible, sans faire perdre la lisibilité de l'image.
- * Afficher une image avec de nombreuses couleurs et graduations de couleur (par ex. des images photo-graphiques ou photo-réalistes).
- * Créer un contenu d'image avec un contraste minimal entre les zones sombres et les zones claires, par exemple des caractères blancs sur un fond noir. Utiliser des couleurs complémentaires ou pastels le plus souvent possible.
- * Eviter d'afficher des images avec peu de couleurs et des limites nettes et clairement définies entre les couleurs.

Son de fonctionnement du moniteur plasma

Le panneau du moniteur plasma est composé de pixels extrêmement fins et ces pixels émettent de la lumière en fonction des signaux vidéo reçus. Ce principe peut créer un bourdonnement ou un ronflement électrique venant du moniteur plasma. Veuillez également noter que la vitesse de rotation du ventilateur de refroidissement peut augmenter lorsque la température ambiante du moniteur plasma augmente. Lorsque cela se produit, il est possible que vous entendiez le moteur du ventilateur.

Remarque:

Les éléments suivants ne sont pas couverts par la garantie.

- Rémanence
- Sons générés par le panneau, par exemple : Bruit du moteur de ventilateur, ronflement du circuit électrique / bourdonnement du panneau de verre.

Contactez un revendeur agréé ou un revendeur de marque pour d'autres procédures qui conviendront le mieux à vos besoins particuliers.

Important Information

Warning

Not for use in a computer room as defined in the Standard for the Protection of Electronic Computer/Data Processing Equipment ANSI/NFPA 75.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio / TV technician for help.

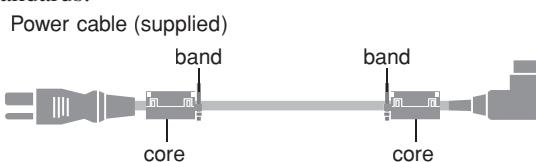

This Class B digital apparatus complies with Canadian ICES-003.

NOTE:

When you use an RGB cable (not supplied), use an RGB cable including the ferrite core (not supplied) on both ends of the cable. If you do not this, this monitor will not conform to mandatory FCC standards.

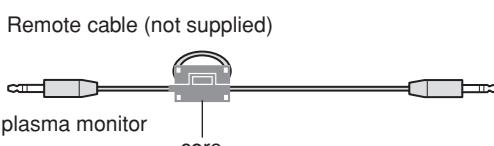

NOTE:

When you use the power cable (supplied), use the supplied ferrite cores. Set the ferrite cores (supplied) on both ends of the power cable (supplied), and then use the bands (supplied) to fasten the ferrite cores (supplied) to the power cable (supplied). If you do not this, this monitor will not conform to mandatory FCC standards.

NOTE:

When you use a remote cable (not supplied), use the supplied ferrite core. Wind the remote cable (not supplied) around the ferrite core (supplied) once, and then fasten the catch. If you do not this, this monitor will not conform to mandatory FCC standards.

Caution

This model is for use with the following optional accessories. Use with other optional accessories is capable of resulting in instability causing possible injury.

Manufacturer's name: D&M Holdings Inc.
Stand: AS6150 for PD6001

Please contact Marantz America, Inc. for approved optional accessories.

WARNING

This product equipped with a three-wire grounding (earthed) plug - a plug that has a third (grounding) pin. This plug only fits a grounding-type power outlet. If you are unable to insert the plug into an outlet, contact a licensed electrician to replace the outlet with a properly grounded one. Do not defeat the safety purpose of the grounding plug.

Operating Environment: PD6001

Operating environment temperature and humidity: 0 °C to +40 °C (+32 °F to +104 °F); less than 80 %RH (cooling vents not blocked)

Do not install this unit in a poorly ventilated area, or in locations exposed to high humidity or direct sunlight (or strong artificial light)

A NOTE ABOUT RECYCLING
This product's packaging materials are recyclable and can be reused. This product and the accessories packed together are the applicable product to the WEEE directive except batteries.

Please dispose of any materials in accordance with your local recycling regulations.

When discarding the unit, comply with your local rules or regulations.

Batteries should never be thrown away or incinerated but disposed of in accordance with your local regulations concerning chemical wastes.

EUROPE ONLY

CAUTION

When disposing of used batteries, please comply with governmental regulations or environmental public instruction's rules that apply in your country/area.

Recommandations importantes

Avertissement

Ne pas utiliser dans une salle d'ordinateurs telle que définie dans la Norme pour la protection des ordinateurs électroniques/appareils de traitement des données ANSI/NFPA75.

Cet appareil a été testé et trouvé conforme avec les limites des appareils numériques de classe B, conformément à l'article 15 du règlement FCC. Ces limites sont conçues pour offrir une protection raisonnable contre les interférences nuisibles dans une installation résidentielle. Cet appareil génère, utilise et peut émettre de l'énergie radiofréquence et, s'il n'est pas installé et utilisé selon les instructions, peut causer des interférences nuisibles aux communications radio. Cependant, il n'y a aucune garantie que de telles interférences ne se produisent pas pour une installation particulière. Si cet appareil causait des interférences nuisibles à la réception radio ou télévisée, ce qui peut être déterminé en mettant l'appareil hors tension, vous êtes encouragé à essayer de corriger ces interférences à l'aide de l'une ou plusieurs mesures suivantes:

- Réorientez ou déplacez l'antenne réceptrice.
- Augmentez l'espace entre l'appareil et le récepteur.
- Connectez l'appareil sur une prise secteur appartenant à un circuit différent de celui sur lequel le récepteur est connecté.
- Consultez votre revendeur ou un technicien radio/télévision expérimenté.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

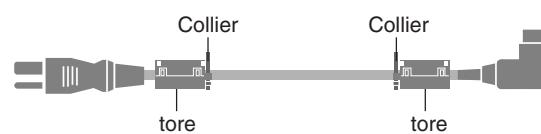

REMARQUE :

Lorsque vous utilisez un câble RGB (non fourni), utilisez un câble RGB comprenant une âme en ferrite (non fourni) à ses deux extrémités. Sinon, ce moniteur ne sera pas conforme aux normes FCC obligatoires.

REMARQUE :

Lorsque vous utilisez le câble d'alimentation (fourni) utilisez les âmes en ferrite fournies. Placez les âmes en ferrite (fournies) aux deux extrémités du câble d'alimentation (fourni) puis utilisez les colliers (fournis) pour fixer les âmes en ferrite (fournies) au câble d'alimentation (fourni). Sinon, ce moniteur ne sera pas conforme aux normes FCC obligatoires.

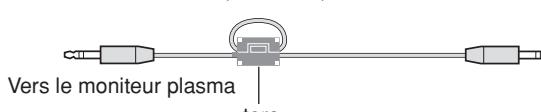

Câble d'alimentation (fourni)

REMARQUE :

Lorsque vous utilisez un câble télécommande (non fourni), utilisez l'âme en ferrite fournie. Enroulez le câble télécommande (non fourni) autour de l'âme en ferrite (fournie) une fois, puis serrez la fermeture. Sinon, ce moniteur ne sera pas conforme aux normes FCC obligatoires.

Câble à distance (non fourni)

Attention

Ce modèle peut être utilisé avec les accessoires optionnels suivants. L'utilisation de ce modèle avec d'autres accessoires optionnels peut entraîner une instabilité qui peut causer des blessures.

Nom du fabricant : D&M Holdings Inc.

Support: AS6150 para PD6001

Veuillez contacter Marantz America, Inc. pour obtenir la liste des accessoires optionnels agréés.

AVERTISSEMENT

Cet appareil est muni d'une fiche de mise à la terre (masse) à trois fils. Comme la fiche présente une troisième broche (de terre), elle ne peut se brancher que sur une prise de courant, prévue pour une mise à la terre. Si vous n'arrivez pas à insérer la fiche dans la prise de courant, contactez un électricien qualifié pour faire remplacer la prise par une qui soit mise à la terre. N'annulez pas la fonction de sécurité que procure cette fiche de mise à la terre.

Milieu de fonctionnement: PD6001

Température et humidité du milieu de fonctionnement: De 0 °C à +40 °C (de +32 °F à +104 °F); Humidité relative inférieure à 80 % (orifices de ventilation non obstrués) N'installez pas l'appareil dans un endroit mal ventilé ou un lieu soumis à une forte humidité ou en plein soleil (ou à une forte lumière artificielle).

REMARQUE CONCERNANT LE RECYCLAGE

Le matériel d'emballage de cet appareil est recyclable et peut être réutilisé. Cet appareil et les accessoires qui sont emballés avec celui-ci sont conformes, à l'exception des piles, à la directive DEEE (relative aux déchets d'équipements électriques et électroniques).

Jetez ce matériel conformément aux réglementations de recyclage locales.

Pour mettre l'appareil au rebut, respectez les règles ou réglementations locales.

Les piles ne doivent jamais être jetées ou incinérées, mais être mises au rebut conformément aux réglementations locales concernant les déchets chimiques.

L'EUROPE UNIQUEMENT

ATTENTION

Lorsque vous déposez de piles / batteries usées, veuillez vous conformer aux normes gouvernementales ou environnementales en vigueur dans votre pays ou région.

Contents of the Package

- Plasma monitor (×1)
- Power cord (×1, 3 m/9.8 feet)
- Remote control (×1)
- AAA Batteries (×2, Manganese battery for remote control)
- User guide
- Ferrite cores for power cord (×2), bands for power cord (×2)
- Ferrite core for remote cable (×2)
- Cable clamps (×3), beads bands (×3)
- Warranty card (×2)

Options

- Wall mount unit
- Tilt mount unit
- Tabletop Stand

Installation

You can attach your optional mounts or stand to the plasma monitor in one of the following two ways:

- * While it is upright. (See Drawing A)
- * As it is laid down with the screen face down (See Drawing B). Lay the protective sheet, which was wrapped around the monitor when it was packaged, beneath the screen surface so as not to scratch the screen face.
- * Do not touch or hold the screen face when carrying the unit.

• This device cannot be installed on its own. Be sure to use a stand or original mounting unit. (Wall mount unit, Stand, etc.)

• For correct installation and mounting it is strongly recommended to use a trained, authorized dealer.

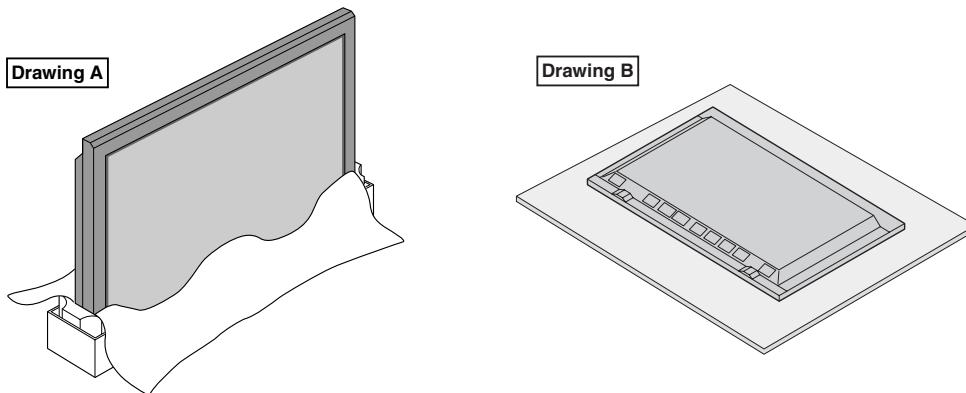

Failure to follow correct mounting procedures could result in damage to the equipment or injury to the installer.

Product warranty does not cover damage caused by improper installation.

CAUTION

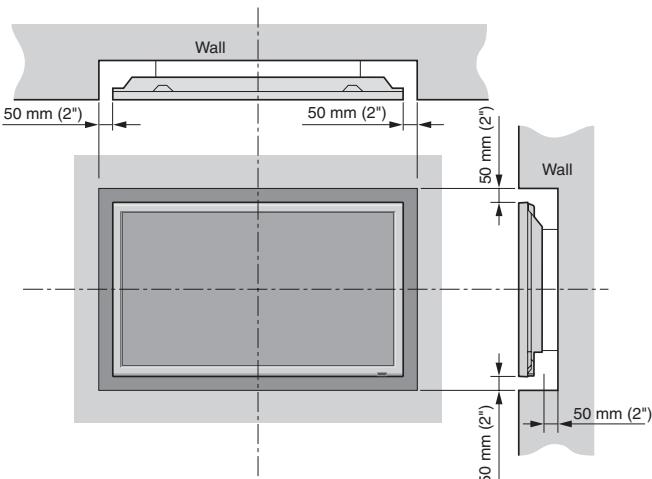

- Install the device following the manual of the optional unit.
- Install the device on the stable and even place where it is strong enough to stand the weight.
- Use the specified clasps for installing.
- After installation, make sure to take measurements to prevent falling.
- Make sure to move or install the device with another person(s).

*** Use only a mounting kit or stand recommended by the manufacturer and listed as an accessory.**

Ventilation Requirements for enclosure mounting

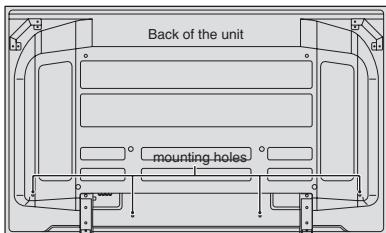

To allow heat to disperse, leave space between surrounding objects as shown on the diagram when installing.

Cable Management

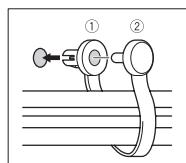

Using the cable clamps and beads bands provided with the plasma display; Bundle the signal and audio cables at the back of the unit to connect to the display.

PD6001

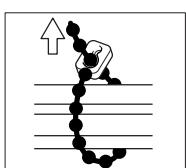

To attach

Insert ① into a mounting hole, then snap ② into the back of ① to fix the clamp.

Clampers are designed to be difficult to undo once in place. Please attach carefully. Cables can be routed to the right or left.

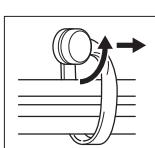

Bunch separated cables together and secure them with the provided beads bands.

Do not allow excessive stress to be placed on the ends of cables.

To detach

Using pliers, twist the clamp 90° and pull it outward. In some cases the clamp may have deteriorated over time and may get damaged when removed.

Using the remote control

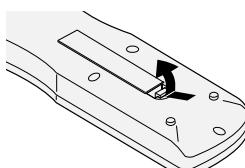

Battery Installation and Replacement

Designated batteries:

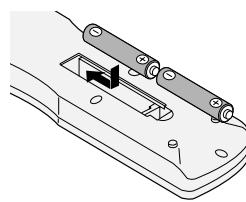

Please use size AAA (R03) or AAA (LR03).

Insert the 2 "AAA" batteries, making sure to set them in with the proper polarity.

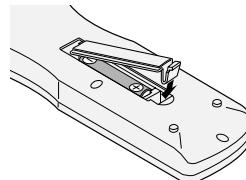

1. Press and open the cover.

2. Align the batteries according to the $+$ and $-$ indication inside the case.

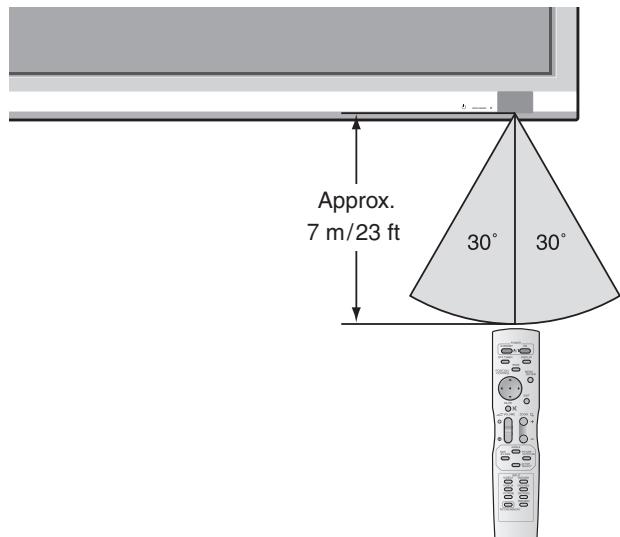

3. Replace the cover.

Operating Range

* Use the remote control within a distance of about 7 m/ 23 ft. from the front of the monitor's remote control sensor and at horizontal and vertical angles of up to approximately 30°.

* The remote control operation may not function if the monitor's remote control sensor is exposed to direct sunlight or strong artificial light, or if there is an obstacle between the sensor and the remote control.

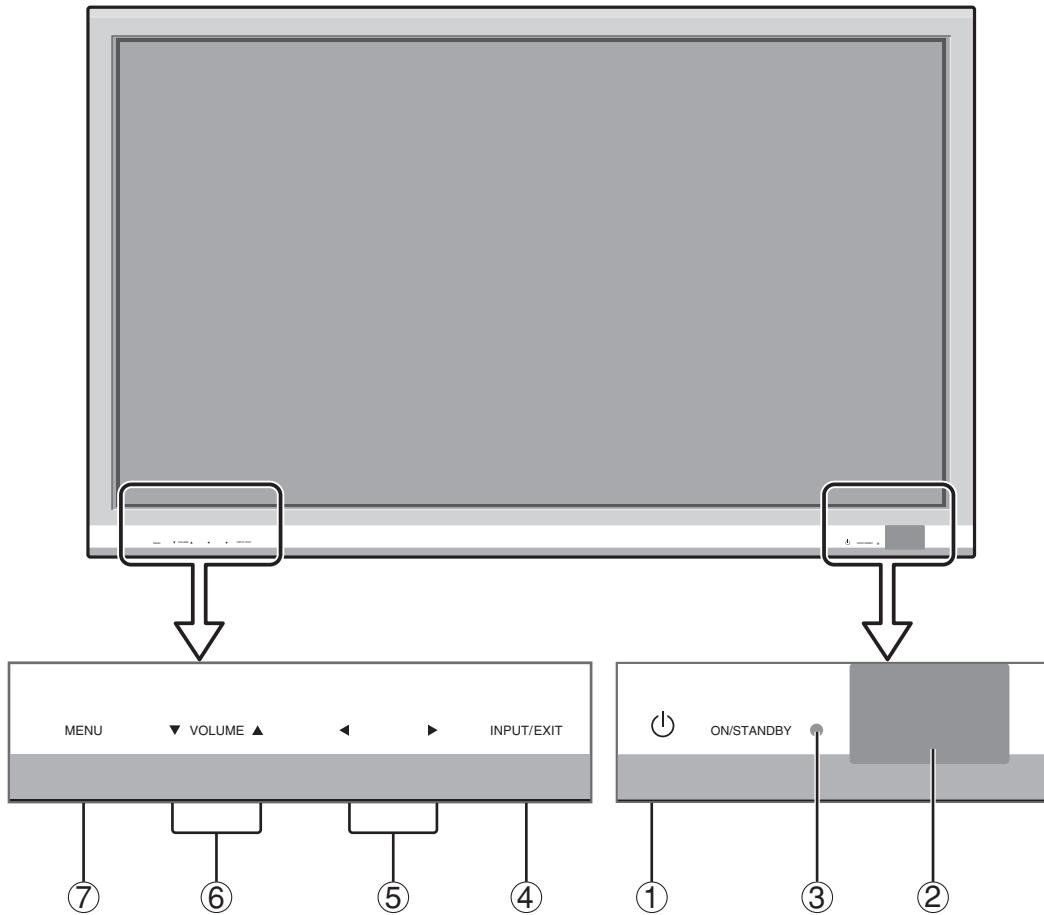

CAUTION

- Use only the specified batteries.
- Make sure to insert the batteries correctly according to the indications of $+$ and $-$.
- Do not drop or mishandle the remote control.
- Do not get the remote control wet. If the remote control gets wet, wipe it dry immediately.
- Avoid heat and humidity.
- When not using the remote control for a long period, remove the batteries.
- Do not use new and old batteries together, or use different types together.
- Do not take apart the batteries, heat them, or throw them into a fire.

Part Names and Function

Front View

① Power

Turns the monitor's power on and off.

② Remote sensor window

Receives the signals from the remote control.

③ ON/STANDBY indicator

When the power is on Lights green.
When the power is in the standby mode ... Lights red.

④ INPUT / EXIT

Switches the input.
Functions as the EXIT buttons in the On-Screen Menu (OSM) mode.

⑤ CURSOR ▲ and ▼

Enlarges or reduces the image. Functions as the CURSOR (▲/▼) buttons in the On-Screen Menu (OSM) mode.

⑥ VOLUME ▼ and ▲

Adjusts the volume. Functions as the CURSOR (▼/▲) buttons in the On-Screen Menu (OSM) mode.

⑦ MENU

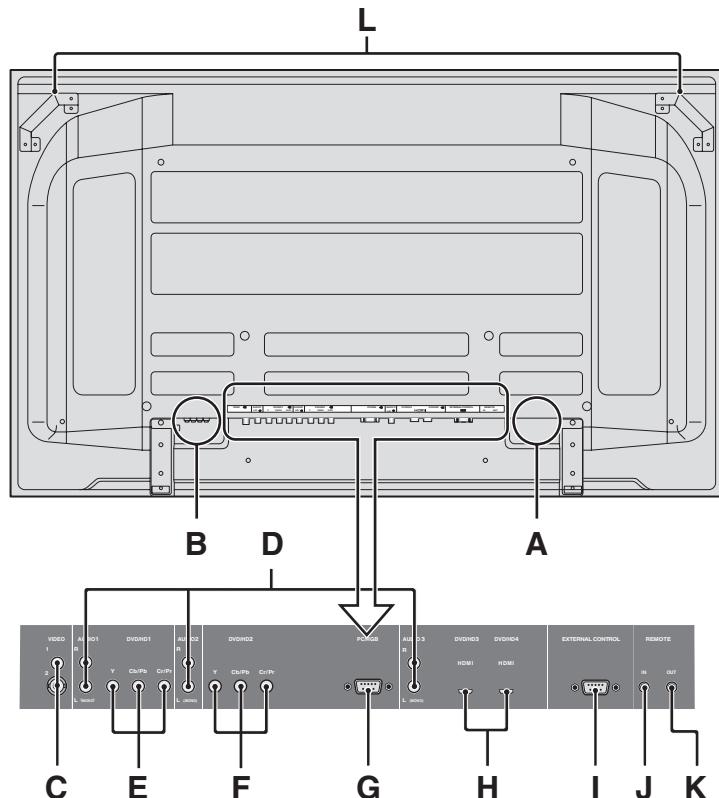

Sets the On-Screen Menu (OSM) mode and displays the main menu.

WARNING

The Power on/off switch does not completely disconnect power from the display.

Rear View/ Terminal Board

PD6001

A AC IN

Connect the included power cord here.

B EXT SPEAKER L and R

Connect speakers (optional) here. Maintain the correct polarity. Connect the \oplus (positive) speaker wire to the \oplus EXT SPEAKER terminal and the \ominus (negative) speaker wire to the \ominus EXT SPEAKER terminal on both LEFT and RIGHT channels.

Please refer to your speaker's owner's manual.

C VIDEO1, 2 (RCA, S-Video)

Connect VCR's, DVD's or Video Cameras, etc. here.

D AUDIO1, AUDIO2, AUDIO3

These are audio input terminals.

The input is selectable. Set which video image corresponds to the audio input from the audio menu screen.

E DVD/HD1

Connect DVD's, High Definition or Laser Discs, etc. here.

F DVD/HD2

You can connect DVDs, High Definition sources, Laser Discs, etc. here.

G PC/RGB (D-Sub)

Connect an analog RGB signal from a computer, etc. here.

H DVD/HD3, DVD/HD4 (HDMI)

Connect a digital signal from a source with a HDMI output. See "Specifications" on "Model Information".

I EXTERNAL CONTROL (D-Sub)

This terminal is used when operating and controlling the monitor externally with a control system (by RS-232C).

J REMOTE IN

K REMOTE OUT

Use these terminals to control external equipment.

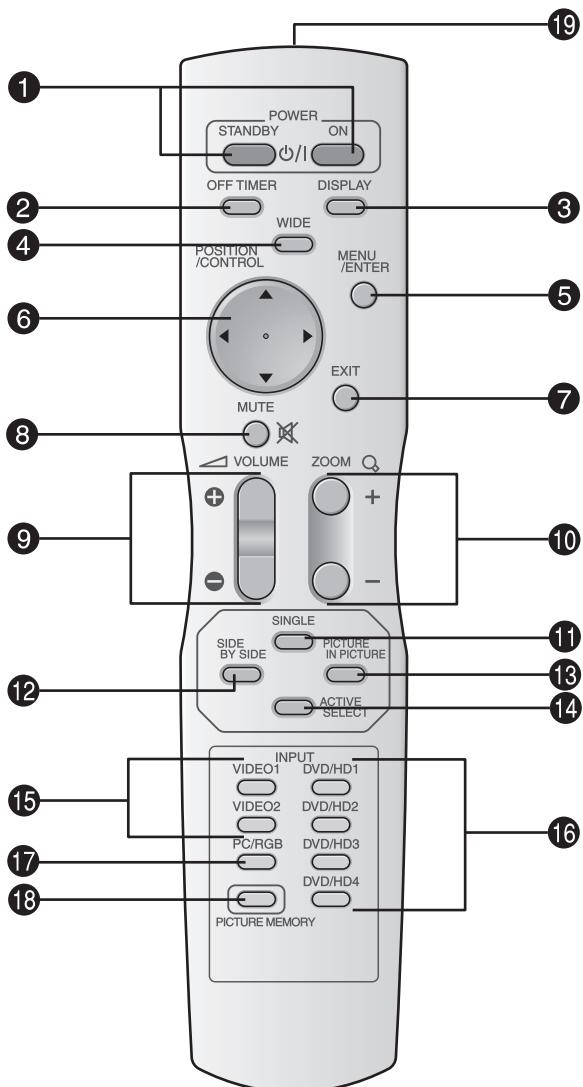

L Handles

Use when installing or carrying the plasma monitor.

HDMI, the HDMI logo and High-Definition Multimedia Interface are trademarks or registered trademarks of HDMI Licensing LLC.

Remote Control

① POWER ON/STANDBY

Switches the power on/standby.

(This does not operate when the ON/STANDBY indicator of the plasma is off.)

② OFF TIMER

Activates the off timer for the unit.

③ DISPLAY

Displays the source settings on the screen.

④ WIDE

Automatically detects the signal and sets the aspect ratio.

WIDE button is not active for all signals.

⑤ MENU/ENTER

Press this button to access the OSM controls.

Press this button during the display of the main menu to go to the sub menu.

⑥ CURSOR (▲ / ▼ / ◀ / ▶)

Use these buttons to select items or settings and to adjust settings or switch the display patterns.

⑦ EXIT

Press this button to exit the OSM controls in the main menu. Press this button during the display of the sub menu to return to the previous menu.

⑧ MUTE

Mutes the audio.

⑨ VOLUME (+/-)

Adjusts the audio volume.

⑩ ZOOM (+/-)

Enlarges or reduces the image.

⑪ SINGLE

Cancels the split screen mode.

⑫ SIDE BY SIDE

Press this button to show a couple of pictures in the side-by-side mode.

⑬ PICTURE IN PICTURE

Press this button to show a couple of pictures in the picture-in-picture mode.

⑭ ACTIVE SELECT

Press this button to make the desired picture activate during split screen mode.

When the PICTURE FREEZE function is operating, this button can be used to display still images on the sub screen.

⑮ VIDEO1, 2

Press this button to select VIDEO as the source.

VIDEO can also be selected using the INPUT/EXIT button on the monitor.

⑯ DVD/HD1, 2, 3, 4

Press this button to select DVD/HD as the source.

DVD/HD can also be selected using the INPUT/EXIT button on the monitor.

⑰ PC/RGB

Press this button to select PC/RGB as the source.

PC/RGB can also be selected using the INPUT/EXIT button on the monitor.

⑱ PICTURE MEMORY

Switches sequentially between picture memory settings 1 to 6.

⑲ Remote control signal transmitter

Transmits the remote control signals.

Basic Operations

POWER

To turn the unit ON and OFF:

1. Plug the power cord into an active AC power outlet.
2. Press the Power button (on the unit).
The monitor's ON/STANDBY indicator turns red and the standby mode is set.
3. Press the POWER ON button (on the remote control) to turn on the unit.
The monitor's ON/STANDBY indicator will light up (green) when the unit is on.
4. Press the POWER STANDBY button (on the remote control) or the Power button (on the unit) to turn off the unit.
The monitor's ON/STANDBY indicator turns red and the standby mode is set (only when turning off the unit with the remote control).

VOLUME

To adjust the sound volume:

1. Press and hold the VOLUME \oplus button (on the remote control or the unit) to increase to the desired level.
2. Press and hold the VOLUME \ominus button (on the remote control or the unit) to decrease to the desired level.

MUTE

To mute the audio:

Press the MUTE button on the remote control to mute the audio; press again to restore.

DISPLAY

To check the settings:

1. The screen changes each time the DISPLAY button is pressed.
2. If the button is not pressed for approximately three seconds, the menu turns off.

DIGITAL ZOOM

Digital zoom specifies the picture position and enlarges the picture.

1. (Be sure ZOOM NAV is off.)

Press the ZOOM (+ or -) button to display magnifying glass. ()

To change the size of the picture:

Press the ZOOM+ button and enlarge the picture.

A press of the ZOOM- button will reduce the picture and return it to its original size.

To change the picture position:

Select the position with the $\blacktriangle\blacktriangledown\blackleftarrow\blackrightarrow$ buttons.

2. Press the EXIT button to delete the pointer.

OFF TIMER

To set the off timer:

The off timer can be set to turn the power off after 30, 60, 90 or 120 minutes.

1. Press the OFF TIMER button to start the timer at 30 minutes.
2. Press the OFF TIMER button to the desired time.
3. The timer starts when the menu turns off.

$\rightarrow 30 \rightarrow 60 \rightarrow 90 \rightarrow 120 \rightarrow 0$

To check the remaining time:

1. Once the off timer has been set, press the OFF TIMER button once.
2. The remaining time is displayed, then turns off after a few seconds.
3. When five minutes remain the remaining time appears until it reaches zero.

To cancel the off timer:

1. Press the OFF TIMER button twice in a row.
2. The off timer is canceled.

Note:

After the power is turned off with the off timer ...

A slight current is still supplied to the monitor. When you are leaving the room or do not plan to use the system for a long period of time, turn off the power to the monitor.

WIDE Operations

Wide Screen Operation (manual)

With this function, you can select one of seven screen sizes.

When viewing videos or digital video discs

1. Press the WIDE button on the remote control.

2. *Within 3 seconds ...*

Press the WIDE button again.

The screen size switches as follows:

→ NORMAL → ANAMORPHIC → STADIUM → ZOOM → 2.35:1 → 14:9 → UNDERSCAN

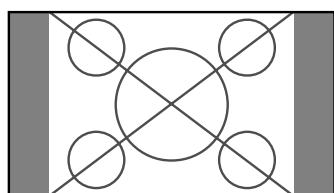

When a 720P or 1080I signal is input:

ANAMORPHIC ↔ 2.35:1

When displaying enhanced split screen:

NORMAL ↔ ANAMORPHIC

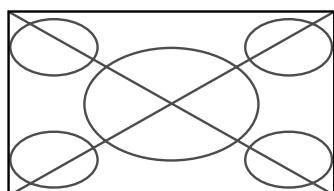

NORMAL size screen (4:3)

The normal size screen is displayed.

* The picture has the same size as video pictures with a 4 : 3 aspect ratio.

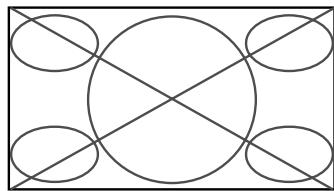

ANAMORPHIC size screen

The image is expanded in the horizontal direction.

* Images compressed in the horizontal direction ("squeezed images") are expanded in the horizontal direction and displayed on the entire screen with correct linearity. (Normal images are expanded in the horizontal direction.)

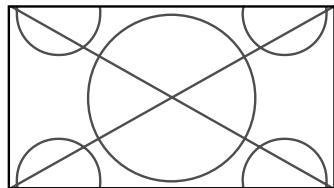

STADIUM size screen

The picture is expanded in the horizontal and vertical directions at different ratios.

* Use this for watching normal video programs (4:3) with a wide screen.

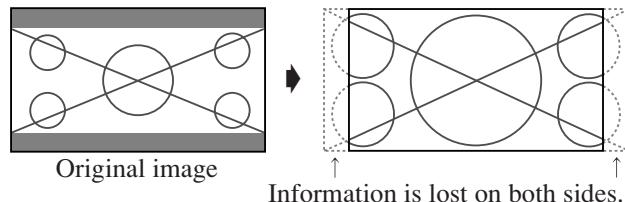

ZOOM size screen

The picture is expanded in the horizontal and vertical direction, maintaining the original proportions.

* Use this for theater size (wide) movies, etc.

2.35:1 size screen

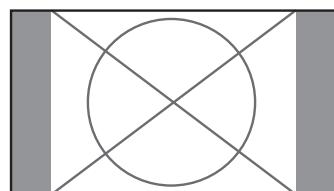

The squeezed film image is expanded to fulfill the entire screen at a ratio of 2.35:1. Black bands do not appear at the top and bottom but information is lost on the left and right margins.

* This feature is available when the input signal is video, component (480I, 480P, 576I, 576P, 720P, 1080I) or RGB (525P or 625P signal from a scan converter).

* If black bands appear on the top and bottom in the full size screen, select the 2.35:1 size screen to fill the screen and avoid image retention.

14:9 size screen

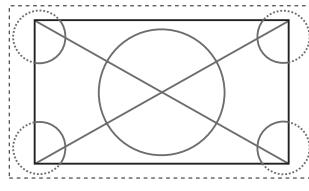

The image is displayed at a 14:9 aspect ratio.

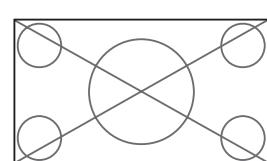

* This feature is available when the input signal is video, component (480I, 480P, 576I, 576P) or RGB (525P or 625P signal from a scan converter).

UNDERSCAN size screen

Set "UNDERSCAN" to "ON" in the "IMAGE ADJUST". Typical televisions crop the image (i.e., overscan). In order to restore the entire image, select UNDERSCAN.

Overscan

Underscan

* Picture noise or black border may appear near the edge of screen depending on the connected component.

* The continuous display in this screen size over a prolonged period of time may result in image retention.

* When Macrovision signal is input, the brightness may change.

Note:

Do not allow 4:3 content to be displayed for extended periods of time without using gray bars. This can cause image retention.

Wide Screen Operation with Computer Signals

Switch to the wide screen mode to expand the 4 : 3 image to fill the entire screen.

1. Press the WIDE button on the remote control.

2. *Within 3 seconds* ...

Press the WIDE button again.

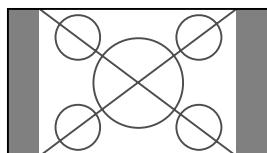

The screen size switches as follows:

→ **NORMAL** → **ANAMORPHIC** → **ZOOM** →

When displaying enhanced split screen:

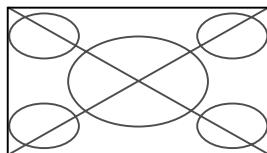

NORMAL ↔ **ANAMORPHIC**

NORMAL size screen (4:3 or SXGA 5:4)

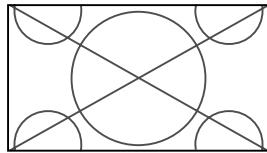

The picture has the same size as the normal computer image.

ANAMORPHIC size screen

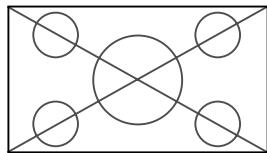

The image is expanded in the horizontal direction.

ZOOM size screen

When wide signals are input.

ANAMORPHIC size screen

Information

■ Supported resolution

See page 39, 42 and 45 for details on the display output of the various VESA signal standards supported by the monitor.

■ When 852 (848) dot × 480 line wide VGA* signals with a vertical frequency of 60 Hz and horizontal frequency of 31.7 (31.0) kHz are input

Select an appropriate setting for RGB SELECT mode referring to the "Table of Signals Supported" on page 39, 42 and 45.

* "VGA", "SVGA" and "SXGA" are registered trademarks of IBM, Inc. of the United States.

Note:

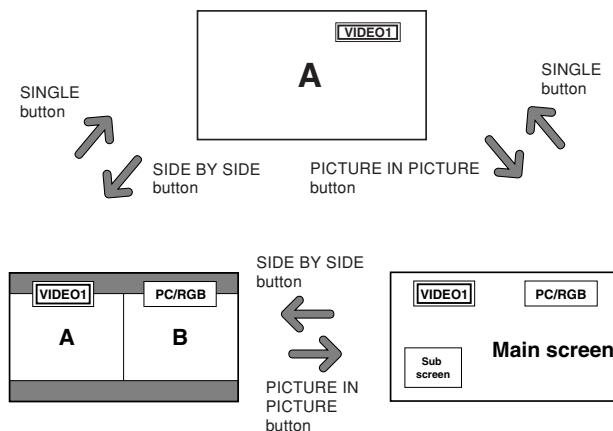

Do not allow 4:3 content to be displayed for extended periods of time without using gray bars. This can cause image retention.

SPLIT SCREEN Operations

Showing a couple of pictures on the screen at the same time

* There may be some RGB-input signals that may not be displayed as not all signals are supported.

1. Press the button to select a screen mode from among single mode, side-by-side, and picture-in-picture.

Note:

Picture A and B on the above screen are not always of the same height.

Information

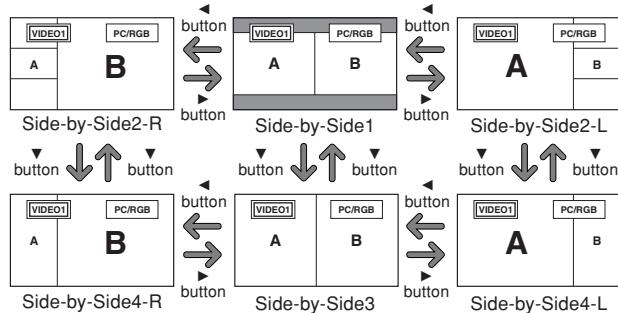

Split screen operations may not function depending on the combination of input signals. In the table below, “○” means Yes, “×” means No.

		Pictures displayed on the right/main screen (Select1)						
		VIDEO1	VIDEO2	DVD/HD1	DVD/HD2	DVD/HD3	DVD/HD4	PC/RGB
Pictures displayed on the left/sub screen (Select2)	VIDEO1	×	×	○	○	○	○	○
	VIDEO2	×	×	○	○	○	○	○
	DVD/HD1	○	○	×	○	○	○	○
	DVD/HD2	○	○	○	×	○	○	○
	DVD/HD3	○	○	○	○	×	×	○
	DVD/HD4	○	○	○	○	×	×	○
PC/RGB		○	○	○	○	○	○	×

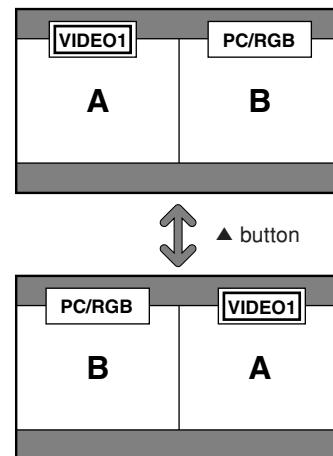

■ Split screen operations may not function depending on the frequency of the RGB signals.

Operations in the Side-by-side mode

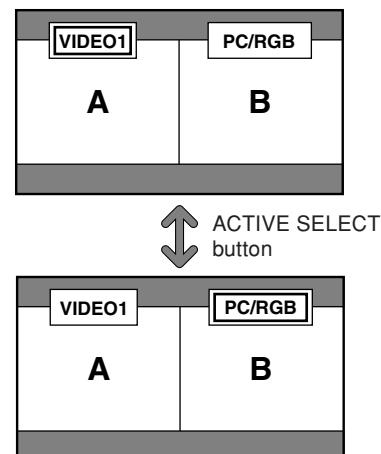

To change the picture size, press the cursor **◀▶** or **▼** button.

To swap the picture on the right and the left, press the cursor **▲** button.

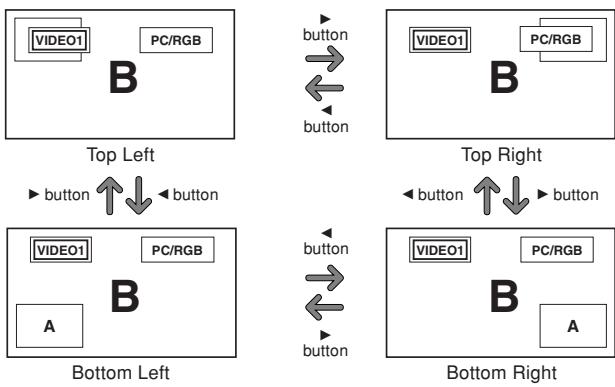

To make the desired picture active, press the ACTIVE SELECT button.

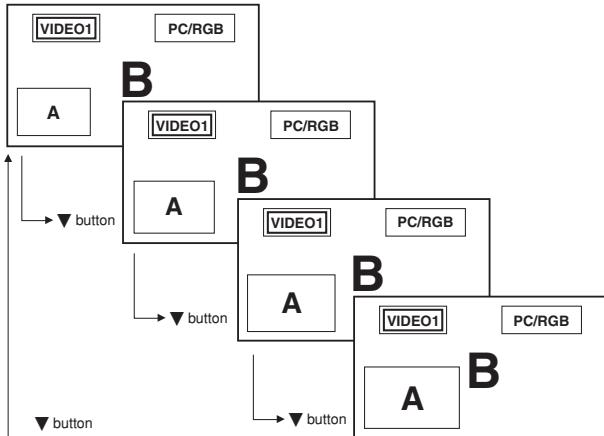

Operations in the Picture-in-picture mode

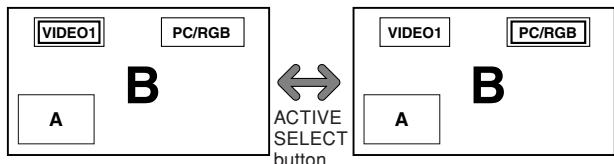

To move the position of the sub screen, press the cursor **◀** or **▶** button.

To change the size of the sub screen, press the **▼** button.

To make the desired picture active, press the ACTIVE SELECT button.

Selecting the input signals to be displayed

1. Press the ACTIVE SELECT button to make the desired picture active.
2. Press the PC/RGB, VIDEO1, 2 or DVD/HD1, 2, 3, 4 button to change the selection of the input signal. The INPUT/EXIT button on the monitor can also be used to change the selection.

Zooming in on a specific input

1. Press the ACTIVE SELECT button to make the desired picture active.
2. Use the ZOOM (+ or -) button to enlarge the picture. For details, see "DIGITAL ZOOM" on page 15.

Adjusting the OSM controls

1. Press the ACTIVE SELECT button to make the desired picture active.
2. Press the MENU/ENTER button to display the MAIN MENU.
3. Adjust the setting to your preference. For details, see "OSM (On Screen Menu) Controls" on page 20.

Note:

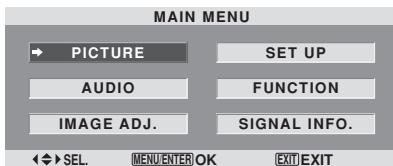

During enhanced split screen, some functions of OSM controls are not available.

OSM (On Screen Menu) Controls

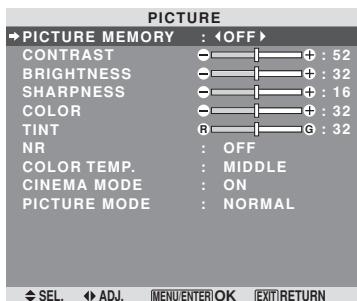

Menu Operations

The following describes how to use the menus and the selected items.

1. Press the MENU/ENTER button on the remote control to display the MAIN MENU.

2. Press the cursor buttons **▲ ▼** on the remote control to highlight the menu you wish to enter.
3. Press the MENU/ENTER button on the remote control to select a sub menu or item.

4. Adjust the level or change the setting of the selected item by using the cursor buttons **◀ ▶** on the remote control.

5. The adjustments or settings are then stored in memory. The change is stored until another change is made.
6. Repeat steps 2 – 5 to adjust an additional item, or press the EXIT button on the remote control to return to the main menu.

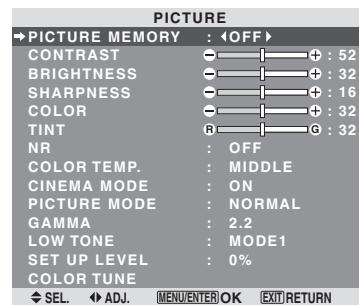

* When adjusting using the bar at the bottom of the screen, press the **◀** or **▶** button within 5 seconds. If not, the current setting is stored and the previous screen appears.

Note: The main menu disappears by pressing the EXIT button.

Information

■ Advanced menu mode

When “ADVANCED OSM” is set to “ON” in the FUNCTION menu, full menu items will be shown.

* The actual screen may be different from the ones in this manual.

Menu Tree

■ : Shaded areas indicate the default value.

←→+ : Press the ▲ or ▼ button to adjust.

□ : Menu items in a ruled box are available when the ADVANCED OSM is set to ON.

Information

■ Restoring the factory default settings

Select "ALL RESET" under the SET UP menu. Note that this also restores other settings to the factory defaults.

Picture Settings Menu

Storing picture settings

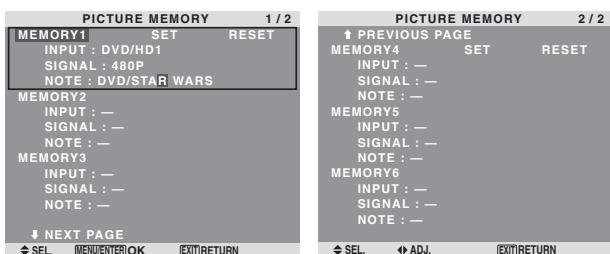

This function allows you to store in memory the current input signal and PICTURE menu settings and to recall these settings when necessary.

There are six picture memories, and notes of up to 15 characters can be added to each.

Example: Storing picture settings at MEMORY1

On "PICTURE MEMORY" of "PICTURE" menu, select "MEMORY1", then press the MENU/ENTER button.

The "PICTURE MEMORY" screen appears.

Information

■ PICTURE MEMORY Settings

OFF: Picture memory not used.

MEMORY1 to 6: Picture memory with the specified number used. Maximum memories are 6, not depending on inputs.

■ Setting the memory

- Use the **▲** and **▼** button to select the desired memory place, MEMORY1 to MEMORY6.
- Use the **◀** and **▶** buttons to select "SET", then press the MENU/ENTER button.
- If necessary, input a note.

■ Resetting the memory

Use the **▲** and **▼** button to select the desired memory place, MEMORY1 to MEMORY6, then use the **◀** and **▶** buttons to select "RESET", and finally press the MENU/ENTER button.

The memory is cleared, and "—" is displayed in the "INPUT", "SIGNAL" and "NOTE" columns.

■ Inputting notes

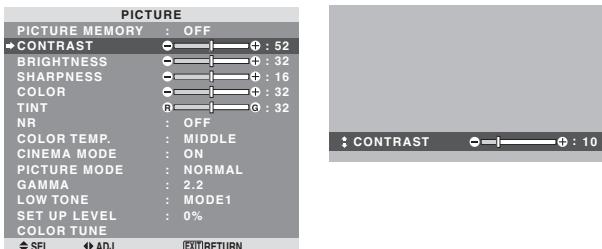

- Use the **◀** and **▶** buttons to select "NOTE", then press the MENU/ENTER button.
- Input the note.
Use the **▲** and **▼** button to select the character.
Use the **◀** and **▶** buttons to move the cursor.
Use the EXIT button to delete the character at the cursor position.
- When you have finished inputting the note, press the MENU/ENTER button.

Adjusting the picture

The contrast, brightness, sharpness, color and tint can be adjusted as desired.

Example: Adjusting the contrast

On "CONTRAST" of "PICTURE" menu, adjust the contrast.

Note: If "CAN NOT ADJUST" appears ...

When trying to enter the PICTURE submenu, make sure PICTURE MODE is not set to DEFAULT.

Information

■ Picture adjustment screen

CONTRAST: Changes the picture's white level.

BRIGHTNESS: Changes the picture's black level.

SHARPNESS: Changes the picture's sharpness.

Adjusts picture detail of VIDEO display.

COLOR: Changes the color density.

TINT: Changes the picture's tint. Adjust for natural colored skin, background, etc.

■ Adjusting the computer image

Only the contrast and brightness can be adjusted when a computer signal is connected.

■ Restoring the factory default settings

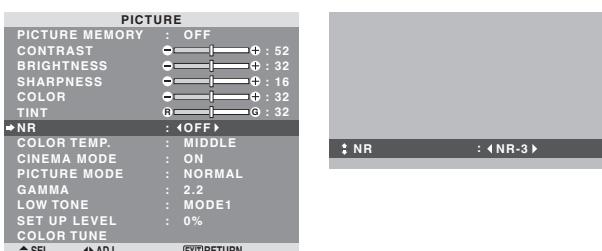

Select "DEFAULT" under the "PICTURE MODE" settings.

Reducing noise in the picture

Use these settings if the picture has noise due to poor reception or when playing video tapes on which the picture quality is poor.

Example: Setting "NR-3"

On "NR" of "PICTURE" menu, select "NR-3".

Information

■ NR

* "NR" stands for Noise Reduction.

* This function reduces noise in the picture.

■ Types of noise reduction

There are three types of noise reduction. Each has a different level of noise reduction.

The effect becomes stronger as the number increases (in the order NR-1 → NR-2 → NR-3).

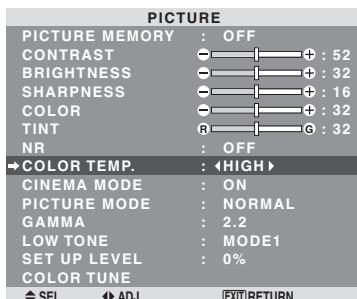

OFF: Turns the noise reduction function off.

Setting the color temperature

Use this procedure to set color tone produced by the plasma display.

Example: Setting "HIGH"

On "COLOR TEMP." of "PICTURE" menu, select "HIGH".

Information

■ Setting the color temperature

LOW: More red

MIDDLE LOW: Slightly red

MIDDLE: Standard (slightly bluer)

HIGH: More blue

Adjusting the color to the desired level

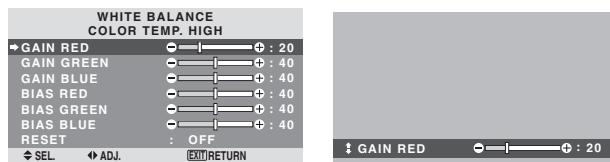

Use this procedure to adjust the white balance for each color temperature to achieve the desired color quality.

Example: Adjusting the "GAIN RED" of "HIGH" color temperature

On "COLOR TEMP." of "PICTURE" menu, select "HIGH", then press the MENU/ENTER button.

The "WHITE BALANCE" screen appears.

On "GAIN RED", adjust the white balance.

Information

■ Adjusting the white balance

GAIN R/G/B: White balance adjustment for white level

BIAS R/G/B: White balance adjustment for black level

RESET: Resets settings to the factory default values.

Use **◀** and **▶** buttons to select "ON", then press the MENU/ENTER button.

■ Restoring the factory default settings

Select "RESET" under the WHITE BALANCE menu.

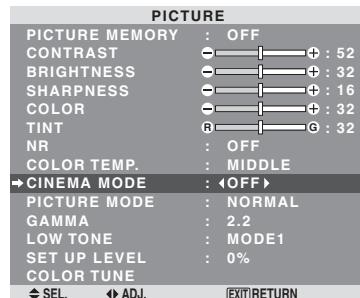

Setting the picture to suit the movie

The film image is automatically discriminated and projected in an image mode suited to the picture.

[NTSC, PAL, PAL60, 480I (60 Hz), 525I (60 Hz), 576I (50 Hz), 625I (50 Hz), 1035I (60 Hz), 1080I (60 Hz) only]

Example: Setting the "CINEMA MODE" to "OFF"

On "CINEMA MODE" of "PICTURE" menu, select "OFF".

Information

■ CINEMA MODE

ON: Automatic discrimination of the image and projection in cinema mode.

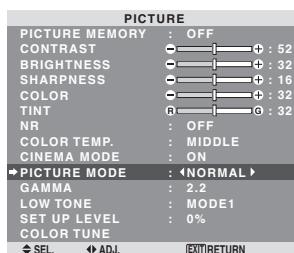

OFF: Cinema mode does not function.

Setting the picture mode according to the brightness of the room

There are four picture modes that can be used effectively according to the environment in which you are viewing the display.

Example: Setting the "THEATER1" mode

On "PICTURE MODE" of "PICTURE" menu, select "THEATER1".

Information

■ Types of picture modes

THEATER1, 2: Set this mode when watching video in a dark room.

This mode provides darker, finer pictures, like the screen in movie theaters.

For a darker image, select THEATER2.

NORMAL: Set this mode when watching video in a bright room.

BRIGHT: This mode provides brighter pictures than NORMAL.

This mode provides dynamic pictures with distinct differences between light and dark sections.

DEFAULT: Use this to reset the picture to the factory default settings.

ISF-DAY and ISF-NIGHT: This mode is displayed only when an ISF dealer performs a maintenance. Please contact Marantz America, Inc. for details.

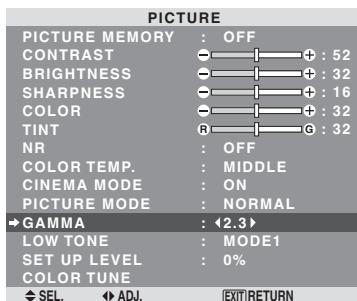

Changing the Gamma Curve

This feature adjusts the brightness of the midtone areas while keeping shadows and highlights unchanged.

Example: Setting “2.3”

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “GAMMA” of “PICTURE” menu, select “2.3”.

Information

■ GAMMA settings

The picture becomes darker as the number increases (in the sequence of 2.1, 2.2, 2.3, 2.4).

* These values are approximate.

Making the Low Tone adjustments

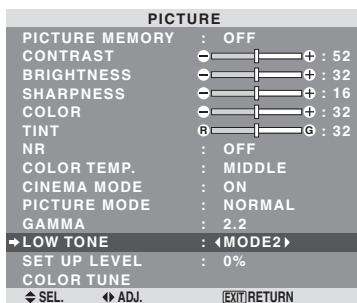

You can select the tone reproduction from 2 modes. This function is effective especially for dark images.

* This function is available only for 50 inch type.

Example: Setting “MODE2”

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “LOW TONE” of “PICTURE” menu, select “MODE2”.

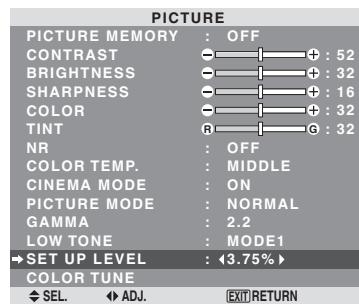

Adjusting the pedestal level (black level)

This feature adjusts the video black level in a video image.

Example: Setting “3.75%”

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “SET UP LEVEL” of “PICTURE” menu, select “3.75%”.

Information

■ SET UP LEVEL settings

0%: Normal status

3.75%: 3.75 % lower than normal

7.5%: 7.5 % lower than normal

Adjusting the colors

Use this procedure to adjust hue and color density for red, green, blue, yellow, magenta and cyan without changing the white point.

You can accentuate the green color of trees, the blue of the sky, etc.

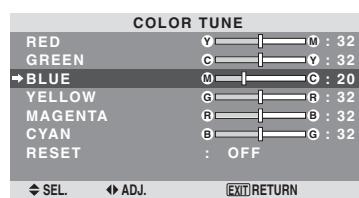

Example: Adjusting the color tune for blue

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “PICTURE” menu, select “COLOR TUNE”, then press the MENU/ENTER button.

The “COLOR TUNE” screen appears.

On “BLUE” of “COLOR TUNE”, adjust the color tune.

Information

■ COLOR TUNE settings

RED: Adjusts hue of Red

GREEN: Adjusts hue of Green

BLUE: Adjusts hue of Blue

YELLOW: Adjusts hue of Yellow

MAGENTA: Adjusts hue of Magenta

CYAN: Adjusts hue of Cyan

RESET: Resets settings to the factory default value.

Use **◀** and **▶** buttons to select “ON”, then press the MENU/ENTER button.

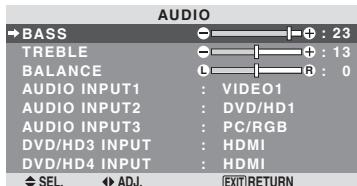

Audio Settings Menu

Adjusting the treble, bass and left/right balance and audio input select

The treble, bass and left/right balance can be adjusted to suit your tastes.

Example: Adjusting the bass

On "BASS" of "AUDIO" menu, adjust the bass.

Note : If "CAN NOT ADJUST" appears...

Set "AUDIO INPUT" on the AUDIO menu correctly.

Information

■ Audio settings menu

BASS: Controls the level of low frequency sound.

TREBLE: Controls the level of high frequency sound.

BALANCE: Controls the balance of the left and right channels.

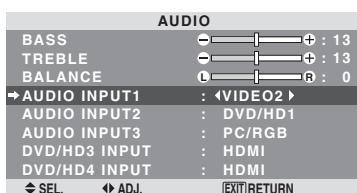

Setting the allocation of the audio and DVD/HD connectors

Setting the AUDIO1-3 and DVD/HD3-4 connectors to the desired input.

Example: Setting "AUDIO INPUT1" to "VIDEO2"

On "AUDIO INPUT1" of "AUDIO" menu, select "VIDEO2".

The available sources depend on the settings of input.

Information

An input cannot be selected as the channel for more than one input terminal.

Image Adjust Settings Menu

Adjusting the Position, Size, Fine Picture, Picture Adj and Underscan

The position of the image can be adjusted and flickering of the image can be corrected.

Example: Adjusting the vertical position in the normal mode

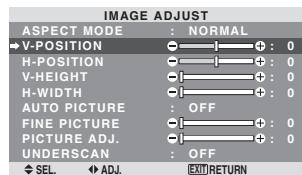

On "V-POSITION" of "IMAGE ADJUST" menu, adjust the position.

The mode switches as follows each time the **◀** or **▶** button is pressed:

NORMAL ↔ ANAMORPHIC

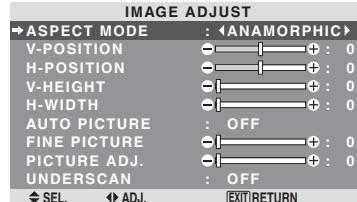

* The mode can also be switched by pressing the WIDE button on the remote control.

* The settings on the IMAGE ADJUST menu are not preset at the factory.

Information

■ When "AUTO PICTURE" is "OFF"

When Auto Picture is off, the Fine Picture and the Picture ADJ. items are displayed so that you can adjust them.

■ Adjusting the Auto Picture

ON: The Picture ADJ., Fine Picture and Position adjustments are made automatically.

Not available for digital ZOOM.

OFF: The Picture ADJ., Fine Picture and Position adjustments are made manually.

* If FINE PICTURE can't be adjusted, set Auto Picture to OFF and adjust manually.

■ Adjusting the position of the image

V-POSITION: Adjusts the vertical position of the image.

H-POSITION: Adjusts the horizontal position of the image.

V-HEIGHT: Adjusts the vertical size of the image. (Not available for STADIUM mode)

H-WIDTH: Adjusts the horizontal size of the image. (Not available for STADIUM mode)

FINE PICTURE*: Adjusts for flickering.

PICTURE ADJ.*: Adjusts for striped patterns on the image (i.e. vertical banding).

* The Picture ADJ. and Fine Picture features are available only when the "Auto Picture" is off.

* The AUTO PICTURE, FINE PICTURE and PICTURE ADJ. are available only for PC/RGB signals.

But, these features are not available for moving pictures on VIDEO, DVD/HD or PC/RGB.

■ Setting the Underscan

Set "ADVANCED OSM" to "ON" in the FUNCTION menu.

ON: UNDERSCAN can be selected in ASPECT MODE.

OFF: UNDERSCAN cannot be selected in ASPECT MODE.

* Selectable only when video signal is input.

SET UP Settings Menu

Setting the language for the menus

The menu display can be set to one of eight languages.

Example: Setting the menu display to “DEUTSCH”

On “LANGUAGE” of “SET UP” menu, select “DEUTSCH”.

SET UP	
LANGUAGE	: DEUTSCH
DVD/HD1 INPUT	: COMPONENT
D-SUB INPUT	: RGB
HD SELECT	: 1080I

Setting high definition images to the suitable screen size

Use this procedure to set whether the number of vertical lines of the input high definition image is 1080I or 1035I or 540P.

Example: Setting the “HD SELECT” mode to “1035I”

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “HD SELECT” of “SET UP” menu, select “1035I”.

SET UP	
LANGUAGE	: ENGLISH
DVD/HD1 INPUT	: COMPONENT
D-SUB INPUT	: RGB

Information

HD SELECT modes

These 3 modes are not displayed in correct image automatically.

1080I: Standard digital broadcasts

1035I: Japanese “High Vision” signal format

540P: Special Digital broadcasts (for example : DTC100)

Setting a computer image to the correct RGB select screen

With the computer image, select the RGB Select mode for a moving image such as (video) mode, wide mode or digital broadcast.

Example: Setting the “RGB SELECT” mode to “852×480”

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “RGB SELECT” of “SET UP” menu, select “852×480”.

SET UP	
LANGUAGE	: ENGLISH
DVD/HD1 INPUT	: COMPONENT
D-SUB INPUT	: RGB

SEL ADJ. EXIT RETURN

Information

■ RGB SELECT modes

AUTO: Select the suitable mode for the specifications of input signals as listed in the table “Computer input signals supported by this system” on page 39, 42 and 45.

The others: The available resolutions are shown.

See page 39, 42 and 45 for the details of the above settings.

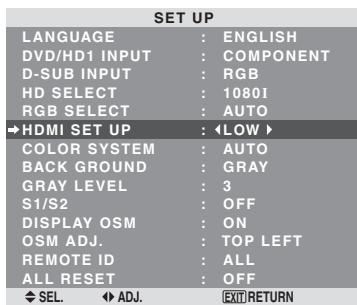

Setting the black level for HDMI signal

Set the black level.

Example: Setting the “HDMI SET UP” mode to “LOW”

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “HDMI SET UP” of “SET UP” menu, select “LOW”.

Information

■ HDMI SET UP settings

LOW: When connected to the PC signal.

HIGH: When connected to the SET TOP BOX, DVD etc. Change “HIGH” into “LOW” if the black level appears gray.

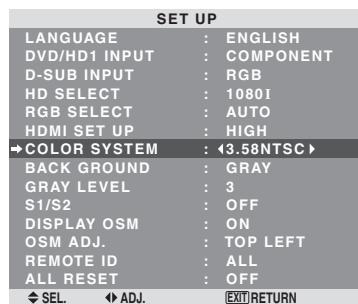

Setting the video signal format

Use these operations to set the color systems of composite video signals or Y/C input signals.

Example: Setting the color system to “3.58 NTSC”

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “COLOR SYSTEM” of “SET UP” menu, select “3.58NTSC”.

Information

■ Video signal formats

Different countries use different formats for video signals. Set to the color system used in your current country.

AUTO: The color systems are automatically identified and the format is set accordingly.

PAL: This is the standard format used mainly in the United Kingdom and Germany.

SECAM: This is the standard format used mainly in France and Russia.

4.43 NTSC, PAL60: This format is used for videos in countries using PAL and SECAM video signals.

3.58 NTSC: This is the standard format used mainly in the United States and Japan.

PAL-M: This is the standard format used mainly in Brazil.

PAL-N: This is the standard format used mainly in Argentina.

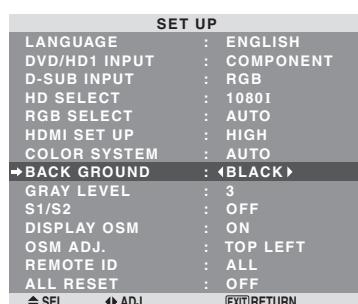

Setting the background color when no signal is being input

The color displayed on the background when there is no signal can be set to gray.

Example: Setting “BACK GROUND” to “BLACK”

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “BACK GROUND” of “SET UP” menu, select “BLACK”.

Information

■ BACK GROUND Settings

BLACK: Sets the background color to black.

GRAY: Sets the background color to gray.

Setting this makes it easier to see that there is no signal.

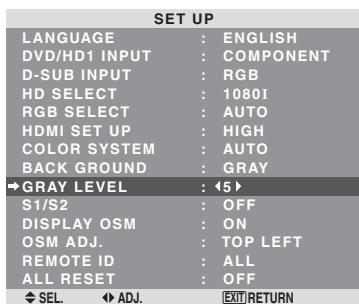

Setting the gray level for the sides of the screen

Use this procedure to set the gray level for the parts on the screen on which nothing is displayed when the screen is set to the 4:3 size.

Example: Setting “GRAY LEVEL” to “5”

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “GRAY LEVEL” of “SET UP” menu, select “5”.

Information

■ GRAY LEVEL settings

This adjusts the brightness of the black (the gray level) for the sides of the screen.

The standard is 0 (black). The level can be adjusted from 0 to 15. The factory setting is 3 (dark gray).

Setting the screen size for S1/S2 video input

If the S-video signal contains screen size information, the image will be automatically adjusted to fit the screen when this S1/S2 is set to AUTO.

This feature is available only when an S-video signal is input via the VIDEO2 terminal.

Example: Setting “S1/S2” to “AUTO”

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “S1/S2” of “SET UP” menu, select “AUTO”.

Information

S1/S2 settings

AUTO: Adjusts the screen size automatically according to the S1/S2 video signal.

F

Turning on/off the menu display

When this is set to OFF, the menu will not be displayed even if you press the MENU/ENTER button.

Example: Turning the DISPLAY OSM off

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “DISPLAY OSM” of “SET UP” menu, select “OFF”.

SET UP	
LANGUAGE	: ENGLISH
DVD/HD1 INPUT	: COMPONENT
D-SUB INPUT	: RGB
HD SELECT	: 1080I
RGB SELECT	: AUTO
HDMI SET UP	: HIGH
COLOR SYSTEM	: AUTO
BACK GROUND	: GRAY
GRAY LEVEL	: 3
S1/S2	: OFF
DISPLAY OSM	: OFF
OSM ADJ.	: TOP LEFT
REMOTE ID	: ALL
ALL RESET	: OFF
SEL	ADJ.
EXIT	RETURN

Information

■ DISPLAY OSM settings

ON: The informations on screen size, volume control, etc. will be shown.

OFF: The informations on screen size, volume control, etc. will not be shown.

The DISPLAY button on the remote control will not function either.

Setting the position of the menu

Adjusts the position of the menu when it appears on the screen.

Example: Set the position to “TOP CENTER”

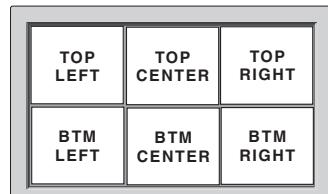

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “OSM ADJ.” of “SET UP” menu, select “TOP CENTER”.

SET UP	
LANGUAGE	: ENGLISH
DVD/HD1 INPUT	: COMPONENT
D-SUB INPUT	: RGB
HD SELECT	: 1080I
RGB SELECT	: AUTO
HDMI SET UP	: HIGH
COLOR SYSTEM	: AUTO
BACK GROUND	: GRAY
GRAY LEVEL	: 3
S1/S2	: OFF
DISPLAY OSM	: ON
OSM ADJ.	: TOP CENTER
REMOTE ID	: ALL
ALL RESET	: OFF
SEL	ADJ.
EXIT	RETURN

Information

■ OSM ADJ. settings

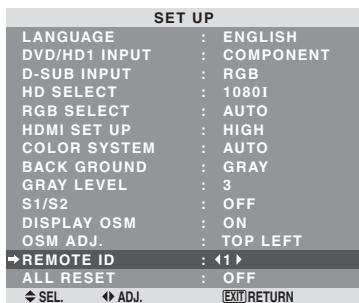

Remote ID

Set the remote code to adapt the plasma monitor to the remote control.

Example: Setting to “1”

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “REMOTE ID” of “SET UP” menu, select “1”.

- Press and hold the POWER ON button, and release the button when the indication saying that the code is set is displayed. Or, press and hold the POWER STANDBY button, and release the button when the power is turned off.

Information

■ REMOTE ID setting

ALL: The remote code is not set.

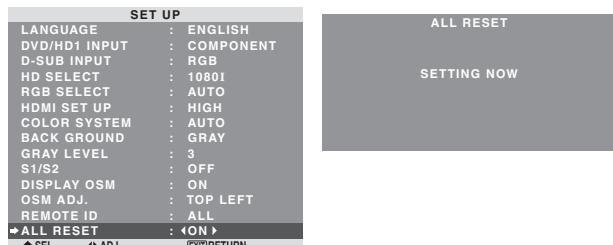

1 to 4: The specified remote code is applied.

Resetting to the default values

Use these operations to restore all the settings (PICTURE, AUDIO, IMAGE ADJUST, SET UP, etc.) to the factory default values.

Refer to page 21 for items to be reset.

On “ALL RESET” of “SET UP” menu, select “ON”, then press the MENU/ENTER button.

When the “SETTING NOW” screen disappears, then all the settings are restored to the default values.

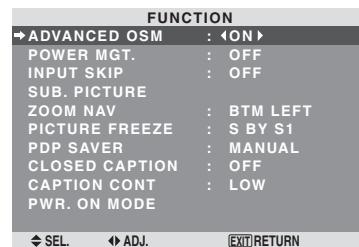

Function Settings Menu

Setting the menu mode

This allows you to access the complete menu.

Example: Setting “ON”

On “ADVANCED OSM” of “FUNCTION” menu, select “ON”.

Information

■ ADVANCED OSM settings

ON: All of the menu items are available for advanced users.

OFF: Some of the menu items are not available (e.g. FUNCTION).

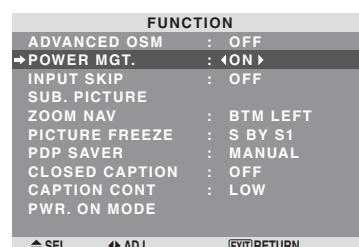

Setting the power management for computer images

This energy-saving (power management) function automatically reduces the monitor’s power consumption if no operation is performed for a certain amount of time.

Example: Turning the power management function on

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “POWER MGT.” of “FUNCTION” menu, select “ON”.

Information

■ Power management function

* The power management function automatically reduces the monitor’s power consumption if the computer’s keyboard or mouse is not operated for a certain amount of time. This function can be used when using the monitor with a computer.

* If the computer’s power is not turned on or if the computer and selector tuner are not properly connected, the system is set to the off state.

* For instructions on using the computer’s power management function, refer to the computer’s operating instructions.

■ Power management settings

ON: In this mode the power management function is turned on.

OFF: In this mode the power management function is turned off.

■ Power management function and ON/STANDBY indicator

The ON/STANDBY indicator indicates the status of the power management function. See page 31 for indicator status and description.

ON/STANDBY indicator

Power management mode	ON/STANDBY indicator	Power management operating status	Description	Turning the picture back on
On	Green	Not activated.	Horizontal and vertical synchronizing signals are present from the computer.	Picture already on.
Off	Red	Activated.	Horizontal and/or vertical synchronizing signals are not sent from the computer.	Operate the keyboard or mouse. The picture reappears.

Setting the Input Skip

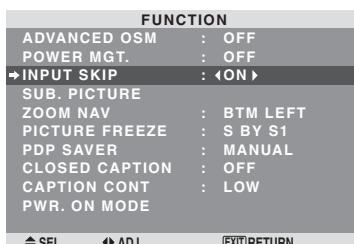

When this is ON, signals which are not present will be skipped over and only pictures whose signals are being transmitted will be displayed.

This setting is valid only for the INPUT/EXIT button on the unit.

Example: Set to "ON"

Set "ADVANCED OSM" to "ON" in the FUNCTION menu.

On "INPUT SKIP" of "FUNCTION" menu, select "ON".

Information

■ INPUT SKIP settings

OFF: Regardless of the presence of the signal, scan and display all signals.

ON: If no input signal is present, skip that signal.

* "SETTING NOW" will appear during the input search.

Removing the sub screen area when there is no input signal detected for the sub screen

This function automatically removes the black frame of the sub screen when there is no sub screen input signal. This feature is available only when the picture-in-picture mode is selected.

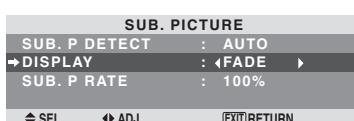

Example: Setting "DISPLAY" to "FADE"

Set "ADVANCED OSM" to "ON" in the FUNCTION menu.

On "SUB. PICTURE" of "FUNCTION" menu, press the MENU/ENTER button.

The "SUB. PICTURE" screen appears.

Adjust the items.

Information

■ SUB. PICTURE Function

* Loss of the input signal means a condition in which the video signal and the sync signal are not present.

* Under conditions in which the sub screen has disappeared, the ZOOM NAV and PICTURE FREEZE functions will not work. The WIDE button will not function either.

■ SUB. P DETECT setting

AUTO: The black frame disappears 3 seconds after the input signal is lost.

OFF: Turns off the SUB. PICTURE function.

■ DISPLAY setting

NORMAL: The sub screen is displayed consistently.

FADE: The sub screen fades in.

■ SUB. P RATE setting

Set the transparency of the sub screen.

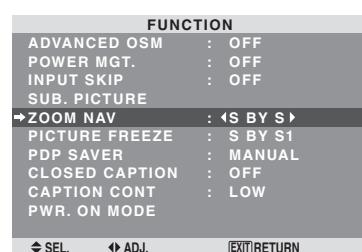

Displaying the entire image during DIGITAL ZOOM operations

Use this function to display the entire image within the sub screen together with an enlarged image on the main screen.

Example: Setting "ZOOM NAV" to "S BY S"

Set "ADVANCED OSM" to "ON" in the FUNCTION menu.

On "ZOOM NAV" of "FUNCTION" menu, select "S BY S".

Information

■ ZOOM NAV Function

* This feature does not function during multi screen mode.

* This feature does not function while PICTURE FREEZE is operating.

* Providing a 2-screen display will cancel this function.

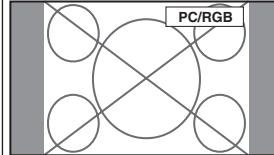

■ ZOOM NAV settings

OFF: Will not show the entire image on the sub screen.

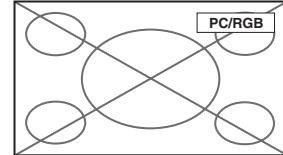

S BY S: Will show the entire image on the sub screen of side-by-side mode.

BTM LEFT~TOP LEFT: Will show the entire image on the sub screen of picture-in-picture mode.

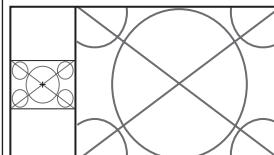

Side-by-Side

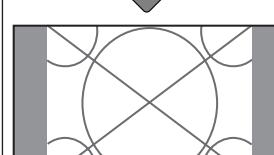

Picture-in-Picture

Zoom+- button

SINGLE button

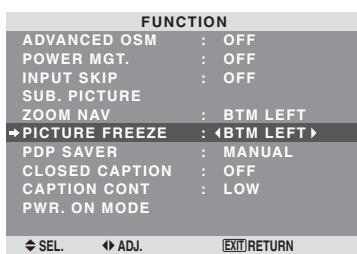

Displaying still images in the sub screen

This feature enables display in the sub screen of still images captured by pressing the ACTIVE SELECT button.

Example: Setting "PICTURE FREEZE" to "BTM LEFT"

Set "ADVANCED OSM" to "ON" in the FUNCTION menu.

On "PICTURE FREEZE" of "FUNCTION" menu, select "BTM LEFT".

Information

■ PICTURE FREEZE Function

- * This feature does not function during multi screen mode.
- * Digital zoom is not available while this function is operating.
- * A further press of the ACTIVE SELECT button while this function is operating will cancel this function.
- * Providing a 2-screen display will cancel this function.

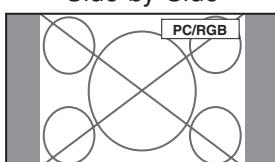

■ PICTURE FREEZE settings

OFF: Will not show the still image.

S BY S1, 2: The still images captured by pressing the ACTIVE SELECT button will be shown on the sub screen of side-by-side mode.

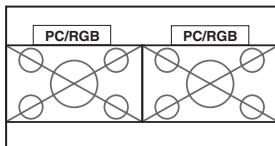

BTM LEFT~TOP LEFT: The still images captured by pressing the ACTIVE SELECT button will be shown on the sub screen of picture-in-picture mode.

Reducing image retention

The brightness of the screen, the position of the picture, positive/negative mode and screen wiper are adjusted to reduce image retention.

Set "ADVANCED OSM" to "ON" in the FUNCTION menu.

On "PDP SAVER" of "FUNCTION" menu, select "MANUAL", then press the MENU/ENTER button.

The "PDP SAVER" screen appears.

Information

■ When set to AUTO

Set automatically, as described below.

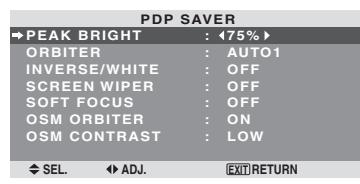

PEAK BRIGHT: 100%
ORBITER: AUTO1 or AUTO2
INVERSE/WHITE: OFF
SCREEN WIPER: OFF
SOFT FOCUS: OFF
OSM ORBITER: ON
OSM CONTRAST: LOW

PEAK BRIGHT

Use this to activate the brightness limiter.

Example: Setting "PEAK BRIGHT" to "75%"

On "PEAK BRIGHT" of "PDP SAVER" menu, select "75%".

Information

■ PEAK BRIGHT settings

100%: The brightness of the screen is adjusted automatically to suit the picture quality.

75%, 50%, 25%: Sets maximum brightness.

The brightness level decreases in the order of 75%, 50%, 25%. 25% provides minimum brightness.

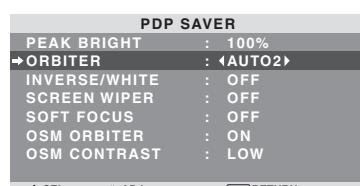

* These values are approximate.

ORBITER

Use this to set the picture shift.

Example: Setting "ORBITER" to "AUTO2"

On "ORBITER" of "PDP SAVER" menu, select "AUTO2".

Information

■ ORBITER settings

OFF: Orbiter mode does not function.

This is the default setting when PC/RGB is input.

AUTO1: The picture moves around the screen intermittently, making the picture smaller. This is the default setting when a Video or a DVD/HD signal is input. Set to "OFF" when these signals are not used.

AUTO2: The picture moves around the screen

intermittently, making the picture bigger.

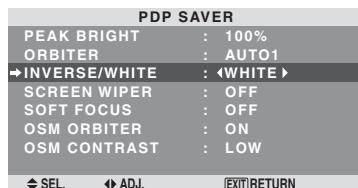

- * When a Video or a DVD/HD signal is input, the AUTO1 and 2 functions will affect only the moving picture and will not make the screen smaller or bigger.

INVERSE/WHITE

Use this to set the inverse mode or to display a white screen.

Example: Setting “INVERSE/WHITE” to “WHITE”

On “INVERSE/WHITE” of “PDP SAVER” menu, select “WHITE”.

Information

■ INVERSE/WHITE Settings

OFF: Inverse/white mode does not function.

INVERSE: The picture is displayed alternately between positive image and negative image.

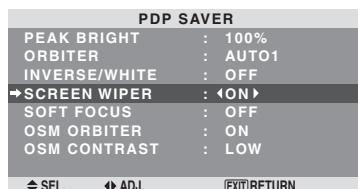

WHITE: The entire screen turns white.

SCREEN WIPER

When this is set to ON, a white vertical bar moves repeatedly from the left end of the screen to the right end at a constant speed.

Example: Setting “SCREEN WIPER” to “ON”

On “SCREEN WIPER” of “PDP SAVER” menu, select “ON”.

Information

■ SCREEN WIPER

ON: The white vertical bar appears.

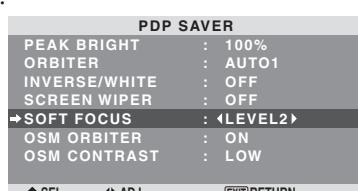

OFF: Screen wiper mode does not function.

SOFT FOCUS

Reduces edges and softens the image.

Example: Setting “SOFT FOCUS” to “LEVEL2”

On “SOFT FOCUS” of “PDP SAVER” menu, select “LEVEL2”.

Information

■ SOFT FOCUS settings

OFF: Turns the SOFT FOCUS function off.

LEVEL1, 2, 3, 4: Activates the SOFT FOCUS setting.

The higher numbers create a softer image.

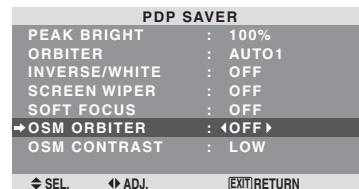

“SHARPNESS” can not be adjusted on the “PICTURE” menu.

OSM ORBITER

Use this to set OSM menu shift.

Example: Setting “OSM ORBITER” to “OFF”

On “OSM ORBITER” of “PDP SAVER” menu, select “OFF”.

Information

■ OSM ORBITER settings

ON: The position of the menu will be shifted by eight dots each time OSM is displayed.

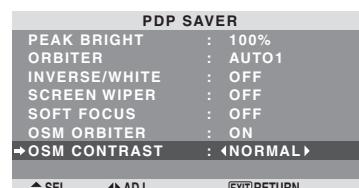

OFF: OSM will be displayed at the same position.

OSM CONTRAST

Use this to reduce the brightness of OSM menu.

Example: Setting “OSM CONTRAST” to “NORMAL”

On “OSM CONTRAST” of “PDP SAVER” menu, select “NORMAL”.

Information

■ OSM CONTRAST settings

NORMAL: OSM brightness is set to normal.

LOW: OSM brightness is set to lower.

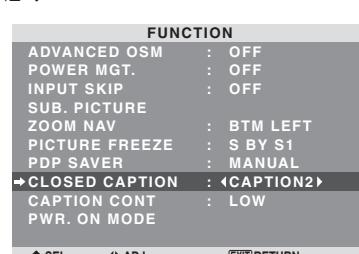

Setting Closed Caption

This function sets several closed caption modes that allows text to be superimposed in the active video.

Example: Setting “CAPTION2”

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “CLOSED CAPTION” of “FUNCTION” menu, select “CAPTION2”.

Information

■ CLOSED CAPTION settings

OFF: This exits the closed caption mode.

CAPTION1~4: Text is superimposed.

TEXT1~4: Text is displayed in full screen.

A closed caption signal may not be decoded in the following signature;

1. when a video tape has been dubbed.
2. when the signal reception is weak.
3. when the signal reception is nonstandard.

When using closed captioned channel or the text mode, the text screen always appears.

When there is no signal, however, the text screen will not display text characters.

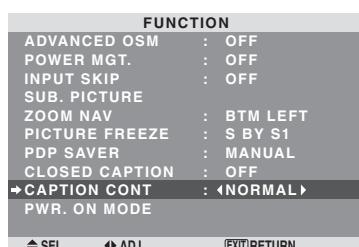

Reducing the brightness of Closed Caption

Use this to reduce the brightness of Closed Caption.

Example: Setting “NORMAL”

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “CAPTION CONT” of “FUNCTION” menu, select “NORMAL”.

Information

■ CAPTION CONT settings

NORMAL: Closed Caption brightness is set to normal.

LOW: Closed Caption brightness is set to lower.

Setting the power on mode

This function sets the input mode and the sound volume at the time the power is switched on.

Example: Setting the input mode to “VIDEO2”

Set “ADVANCED OSM” to “ON” in the FUNCTION menu.

On “FUNCTION” menu, select “PWR.ON MODE”, then press the MENU/ENTER button.

The “PWR.ON MODE” screen appears.

On “INPUT” of “PWR.ON MODE” menu, select “VIDEO2”.

The available inputs depend on the setting of input.

Information

■ INPUT settings

LAST: Last mode (the input that was last selected at the time the power was switched off).

VIDEO1, 2: VIDEO input mode.

DVD/HD1~4: DVD/HD input mode.

PC/RGB: PC/RGB input mode.

MULTI: Multi screen mode.

■ To set MULTI INPUT

- Set the INPUT button to “MULTI”, then press the MENU/ENTER button.

The “MULTI SCREEN SETTING” will appear on the screen.

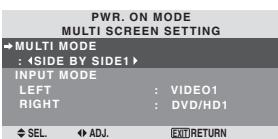

• Use the ▲ and ▼ buttons to select “MULTI MODE”, then use the ◀ and ▶ buttons to choose from “SIDE BY SIDE1~3” and “PICTURE IN PICTURE (BOTTOM LEFT~TOP LEFT)”.

• Use the ▲ and ▼ buttons to select “MAIN”/“SUB” and “LEFT”/“RIGHT”, then use the ◀ and ▶ buttons to choose from “VIDEO1~2”, “DVD/HD1~4” and “PC/RGB”.

SIDE BY SIDE

■ VOLUME settings

LAST: Last mode (the volume that was last selected at the time the power was switched off).

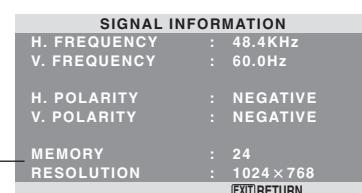

0 to 42: The level of sound volume.

Signal Information Menu

Checking the frequencies, polarities of input signals, and resolution

Use this function to check the frequencies and polarities of the signals currently being input from a computer, etc. On “MAIN MENU”, select “SIGNAL INFO.”, then press the MENU/ENTER button.

The “SIGNAL INFORMATION” is displayed.

PC: MEMORY will be displayed.

Others: MODE will be displayed.

External Control

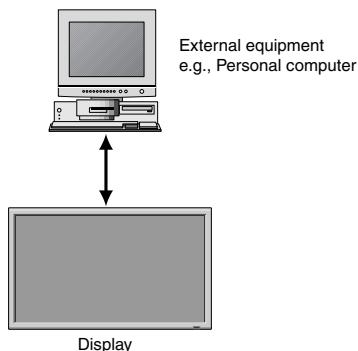

Pin Assignments

Application

These specifications cover the communications control of the plasma monitor by external equipment.

Connections

Connections are made as described below.

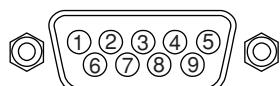

Connector on the plasma monitor side: EXTERNAL CONTROL connector.

Use a crossed (reverse) cable.

Type of connector: D-Sub 9-pin male

Pin No.	Pin Name	Pin No.	Pin Name
1	No Connection	6	DSR (DCE side ready)
2	RXD (Receive data)	7	RTS (Ready to send)
3	TXD (Transmit data)	8	CTS (Clear to send)
4	DTR (DTE side ready)	9	No connection
5	GND		

Communication Parameters

(1) Communication system	Asynchronous
(2) Interface	RS-232C
(3) Baud rate	9600 bps
(4) Data length	8 bits
(5) Parity	Odd
(6) Stop bit	1 bit
(7) Communication code	Hex

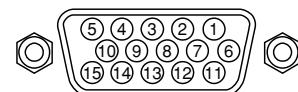

External Control Codes (Reference)

FUNCTION	CODE	DATA
Power ON	9FH	80H 60H 4EH 00H CDH

1/8 Stereo Mini Jack (not supplied) for REMOTE IN/OUT

Plasma monitor REMOTE IN

Plasma monitor REMOTE OUT

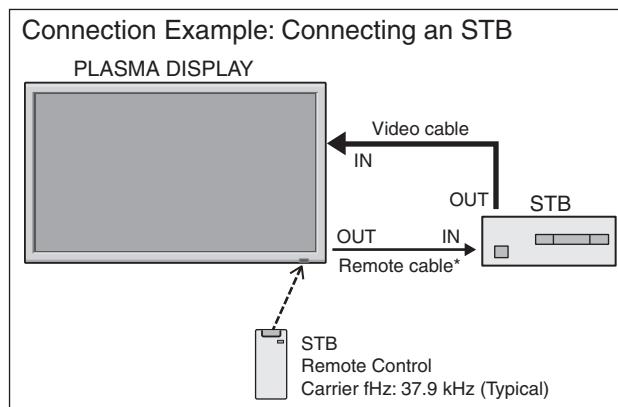

Connection with STB

Following is the connection example of STB (Set-top Box) using the REMOTE IN/OUT connectors of the plasma monitor. Consult your dealer about the actual connection and operation.

* Connection Example

- STB has the REMOTE IN connector.
- The pin assignment of the REMOTE IN connector of STB is same as that of 1/8 stereo mini cable connected to the REMOTE OUT connector (Page 35).
- The transmit frequency of the remote control of STB is 37.9 kHz (Typical).

* The 1/8 Stereo Mini cable must be purchased separately.

Troubleshooting

If the picture quality is poor or there is some other problem, check the adjustments, operations, etc., before requesting service.

Symptom	Checks	Remedy
The unit emits a crackling sound.	• Are the image and sound normal?	• If there are no abnormalities in the image and sound, the noise is caused by the cabinet reacting to changes in temperature. This will not affect performance.
Picture is disturbed. Sound is noisy. Remote control operates erroneously.	• Is a connected component set directly in front or at the side of the display?	• Leave some space between the display and the connected components.
The remote control does not work.	• Are the remote control's batteries worn out?	• Replace both batteries with new ones.
Monitor's power does not turn on when the remote control's power button is pressed.	• Is the monitor's power cord plugged into a power outlet? • Are all the monitor's indicators off? • Are the remote control's batteries worn out?	• Plug the monitor's power cord into a power outlet. • Press the power button on the monitor to turn on the power. • Replace both batteries with new ones.
Monitor does not operate when the remote control's buttons are pressed.	• Is the remote control pointed at the monitor, or is there an obstacle between the remote control and the monitor? • Is direct sunlight or strong artificial light shining on the monitor's remote control sensor? • Are the remote control's batteries worn out?	• Point the remote control at the monitor's remote control sensor when pressing buttons, or remove the obstacle. • Eliminate the light by closing curtains, pointing the light in a different direction, etc. • Replace both batteries with new ones.
No sound or picture is produced.	• Is the monitor's power cord plugged into a power outlet?	• Plug the monitor's power cord into a power outlet.
Picture appears but no sound is produced.	• Is the volume set at the minimum? • Is the mute mode set? • Are the speakers properly connected? • Is AUDIO INPUT set correctly?	• Increase the volume. • Press the remote control's MUTE button. • Connect the speakers properly. • Set AUDIO INPUT on the AUDIO menu correctly.
Poor picture with VIDEO signal input.	• Improper control setting. Local interference. Cable interconnections. Input impedance is not correct level.	• Adjust picture control as needed. Try another location for the monitor. Be sure all connections are secure.
Poor picture with RGB signal input.	• Improper control setting. Incorrect 15 PIN connector pin connections.	• Adjust picture controls as needed. Check pin assignments and connections.
Tint is poor or colors are weak.	• Are the tint and colors properly adjusted?	• Adjust the tint and color (under PICTURE).
Nothing appears on screen.	• Is the computer's power turned on? • Is a source connected? • Is the power management function in the standby or off mode?	• Turn on the computer's power. • Connect source to the monitor. • Operate the computer (move the mouse, etc.).
Part of picture is cut off or picture is not centered.	• Is the position adjustment appropriate?	• Adjust the IMAGE ADJUST properly.
Image is too large or too small.	• Is the screen size adjustment appropriate?	• Press the WIDE button on the remote control and adjust properly.
Picture is unstable.	• Is the computer's resolution setting appropriate?	• Set to the proper resolution.
ON/STANDBY indicator is lighted in red.	• Horizontal and / or vertical sync signal is not present when the Intelligent Power Manager control is on.	• Check the input signal.
ON/STANDBY indicator is blinking in red.	• The temperature inside the main unit has become too high and has activated the protector.	• Promptly switch off the power of the main unit and wait until the internal temperature drops. See *1.
ON/STANDBY indicator is blinking in green and red, or green.	_____	• Promptly switch off the power of the main unit. See *2.

*1 Overheat protector

If the monitor becomes too hot, the overheat protector will be activated and the monitor will be turned off. If this happens, turn off the power to the monitor and unplug the power cord. If the room where the monitor is installed is particularly hot, move the monitor to a cooler location and wait for the monitor to cool for 60 minutes. If the problem persists, contact your dealer.

*2 In the following case, power off the monitor immediately and contact your dealer or authorized Service Center.

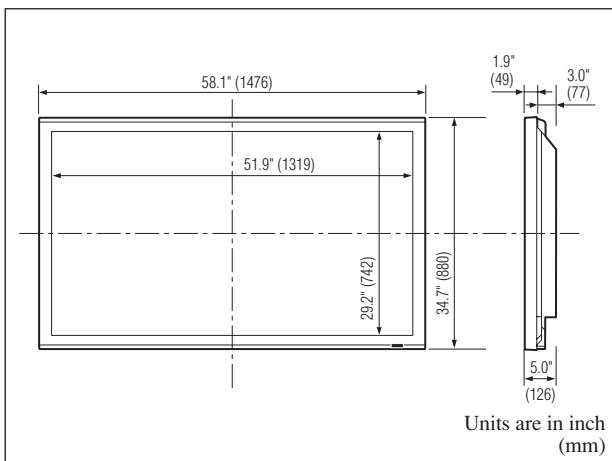

The monitor turns off 5 seconds after powering on and then the ON/STANDBY indicator blinks. It indicates that the power supply circuit, plasma display panel, temperature sensor, or one or more fans have been damaged.

NOTE: Pixel defect

Plasma is one of the most advanced technologies for consumer products. The panel is made by high precision technology, however some pixel defects may be found on the Plasma display panel. We are trying our best to control the quality in order to reduce the number of defective pixels. It is almost impossible to have zero pixel defects, even using the most advanced technology. This is not a problem only for Marantz, but all Plasma manufacturers. Therefore we have to note that the warranty does not cover the Plasma display panel for pixel defects. We appreciate your understanding.

Specifications: PD6001

Screen Size	51.9 inches(H) × 29.2 inches(V) 1319 mm(H) × 742 mm(V) diagonal 60 inches
Aspect Ratio	16 : 9
Resolution	1365 pixels(H) × 768 pixels(V)
Pixel Pitch	0.038 inches(H) × 0.038 inches(V) 0.97 mm(H) × 0.97 mm(V)
Signals	
Synchronization Range	Horizontal : 15.5 kHz to 110.0 kHz (automatic : step scan) Vertical : 50.0 Hz to 120.0 Hz (automatic : step scan)
Input Signals	RGB, NTSC (3.58/4.43), PAL (B,G,M,N), PAL60, SECAM, HD ^{*1} , DVD ^{*1}

1080I (60 Hz)	1080P (50 Hz)	1080P (60 Hz)

***2 HDMI input signals supported on this system.**

Supported Signals

- 640 × 480P @ 59.94/60 Hz
- 1280 × 720P @ 59.94/60 Hz
- 1920 × 1080I @ 59.94/60 Hz
- 720 × 576P @ 50 Hz
- 1440 (720) × 576I @ 50 Hz
- 1280 × 720P @ 50 Hz
- 1440 (720) × 480I @ 59.94/60 Hz

Note: In some cases a signal on the plasma monitor may not be displayed properly. The problem may be an inconsistency with standards from the source equipment (DVD, Set-top box, etc...). If you do experience such a problem please contact Marantz America, Inc. and also the manufacturer of the source equipment.

Table of Signals Supported

Supported resolution: PD6001

- When the screen mode is NORMAL, each signal is converted to a 1024 dots × 768 lines signal. (Except for ^{*2,3})
- When the screen mode is ANAMORPHIC, each signal is converted to a 1365 dots × 768 lines signal. (Except for ^{*2})

*1 Only when using a graphic accelerator board that is capable of displaying 852×480.

*2 The picture is displayed in the original resolution.

*3 The aspect ratio is 5:4. This signal is converted to a 960 dots×768 lines signal.

*4 Normally the RGB select mode suite for the input signals is set automatically. If the picture is not displayed properly, set the RGB mode prepared for the input signals listed in the table above.

*5 To connect the monitor to Macintosh computer, use the monitor adapter (D-Sub 15-pin) to your computer's video port.

*6 Other screen modes (ZOOM and STADIUM) are available as well.

*7 CVT standard compliant.

NOTE:

- While the input signals comply with the resolution listed in the table above, you may have to adjust the position and size of the picture or the fine picture because of errors in synchronization of your computer.
- When a 1280 dots×1024 lines signal or 1600 dots×1200 lines signal is input to the monitor, the picture will be compressed.
- This monitor has a resolution of 1365 dots×768 lines. It is recommended that the input signal should be XGA, wide XGA, or equivalent.
- With digital input some signals are not accepted.
- The sync may be disturbed when a nonstandard signal other than the aforementioned is input.
- If you are connecting a composite sync signal, use the HD terminal.
